Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses,Réka Benczes,Veronika Szelid,2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context

Affect Imagery Consciousness Silvan S. Tomkins, PhD, 2008-02-15 brilliant Malcolm Gladwell Author of Blink The writings for which this essay is offered as a Prologue consumed him from the mid 1950s through the end of his life in 1991 Knowing it was his lifework Tomkins conflated life and work reifying the superstition that its completion would equal

death and refusing to release for publication long completed material He knew the risks associated with this obsessive neurotic behavior and the results were as bad as predicted The first two volumes of Affect Imagery Consciousness AIC were released in 1962 and 1963 Volume III in 1991 shortly before he succumbed to a particularly virulent strain of small cell lymphoma and Volume IV a year after his death This last book contains Tomkins's understanding of neocortical cognition ideas that are even now exciting but until this current publication of his work as a single supervolume almost nobody has read it The bulk of his audience had died along with the enthusiasm generated by his ideas Bigscience is now more a matter of big machines and unifocal discoveries as the basis for pars pro toto reasoning than big ideas based on the assembly and analysis of all that is known Tomkins ignored nothing from any science past or present that might lead him toward a more certain understanding of the mind Every idea every theory deserved attention if only because significant observations can loiter in blind alleys From the Prologue by Donald L Nathanson MD Volume 1 of Springer's magisterial new two volume edition of Tomkins's magnum opus comprises The Positive Affects and The Negative Affects
