Question 1

11 pts

Many do you think the profit margin for Anagene's cartridges has been fluctuating? Is likely attributable to the actual number of cartridges sold at this cartridge changing, or because of the pricing system they are using to calculate the cost?

The actual number of cartridges sold has changed. The company tracked the estimated number of cartridges produced and reduced the quantity of the cartridges sold. This led to the estimated number of cartridges sold changing. The company's pricing system is based on the actual quantity of cartridges sold, so the quantity of cartridges sold has changed.
