**Environmental performance of pig supply chains: Guidelines for assessment (Version 1)** Food and Agriculture Organization of the United Nations, 2018-02-23 This is a living document produced by the Livestock Environmental and Assessment Performance LEAP Partnership The document presents a methodology and provides guidance for the assessment of the environmental performance of pig supply chains It provides users guidance on how to apply the life cycle assessment approach to pig supply chains Demand for livestock products is projected to grow 1.3 percent per year until 2050 driven by global population growth and increasing wealth and urbanization This projected growth places significant pressure on the

livestock sector to perform in a more sustainable way Currently many different methods are used to assess the environmental impacts and performance of livestock products This causes confusion and makes it difficult to compare results and set priorities for continuing improvement The intention of this document is to provide an overview assessment of existing studies and associated methods that have used life cycle assessment for the evaluation of pig supply chains

**Ecology, Planning, and Management of Urban Forests** Margaret M. Carreiro, Yong-Chang Song, Jianguo Wu, 2007-10-31 It has been increasingly recognized that trees and vegetation in urban areas provide a number of ecological services beyond beautifying cities The purpose of urban forestry is to use trees and natural habitat patches to ameliorate negative environmental impacts of cities and to contribute to the creation of more livable ecological sustainable cities Ecology Planning and Management of Urban Forests takes an international approach to sharing knowledge about the management of urban forests that has been learned through studies in many different regions This allows the reader to evaluate methods and management that are appropriate for particular geographic environmental and socio political contexts Urban forests are also approached on regional and landscape scales to encompass more natural environments in and around cities rather than within arbitrary municipal boundaries

**Scientific and Technical Aerospace Reports ,1982      Carbon Footprints as Cultural-Ecological Metaphors**

Anita Girvan,2017-10-10 Through an examination of carbon footprint metaphors this books demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change Existing books and articles on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts This book will be of great interest to researchers and students of environmental humanities political ecology environmental communication and metaphor studies **Dinosaurs and Other Extinct Saurians** Richard Moody,2010 The discovery of dinosaurs and other large extinct saurians a term under

which the Victorians commonly lumped ichthyosaurs plesiosaurs pterosaurs and their kin makes exciting reading and has caught the attention of palaeontologists historians of science and the general public alike The papers in this collection go beyond the familiar tales about famous fossil hunters and focus on relatively little known episodes in the discovery and interpretation from both a scientific and an artistic point of view of dinosaurs and other inhabitants of the Mesozoic world They cover a long time span from the beginnings of modern scientific palaeontology in the 1700s to the present and deal with many parts of the world from the Yorkshire coast to Central India from Bavaria to the Sahara The characters in these stories include professional palaeontologists and geologists some of them well known others quite obscure explorers amateur fossil collectors and artists linked together by their interest in Mesozoic creatures

**Wildlife Forensic Investigation** John E. Cooper, Margaret E. Cooper, 2013-05-23 Wildlife forensics is the application of forensic science to the conservation and protection of non domesticated animals both in the wild and in captivity Providing an in depth introduction to this rapidly evolving field Wildlife Forensic Investigation Principles and Practice also chronicles aspects of the history of management conservation and environmental protection with an emphasis on their global importance in the twenty first century The book examines the crucial role of wildlife forensic investigation with regard to live animals dead animals and samples and covers national regional and international legislation While the text particularly focuses on forensic science as it relates to wild animals it also includes mention of plants and habitats because of their relevance to conservation The book discusses animal welfare as well as the damage that can be inflicted on humans and property by wildlife Offering access to sound evidence based on good science and obtained using the best available practices the book is enhanced by case studies from experts who describe some of their own work This resource is essential for those involved in a range of endeavours including investigating wildlife crime identifying animal remains ascertaining the circumstances of death of wild species and other legal proceedings and activities concerning wildlife The forensic skills described in this book can be applied to a wide range of activities not necessarily involving the legal process including environmental impact assessments insurance claims governmental and other enquiries checking of trading standards and the inspection of for instance pet shops animal boarding establishments and zoological collections The authors point out that one of the most important requirements of those persons involved in wildlife forensic work is to retain an open mind Such personnel should also be conscious of new developments and evolving techniques and be able to anticipate situations where their investigative and scientific skills might be used to advantage so called horizon scanning Examples of these are given
