Rapid Instructional Design George M. Piskurich, 2015-01-27 The classic guide to instructional design fully updated for the new ways we learn Rapid Instructional Design is the industry standard guide to creating effective instructional materials providing no nonsense practicality rather than theory driven text Beginning with a look at what instructional design really means readers are guided step by step through the ADDIE model to explore techniques for analysis design development intervention and evaluation This new third edition has been updated to cover new applications technologies and concepts and includes many new templates real life examples and additional instructor materials Instruction delivery has expanded rapidly in the nine years since the second edition's publication and this update covers all the major advances in the field The major instructional models are expanded to apply to e learning MOOCs mobile learning and social network based learning Informal learning and communities of practice are examined as well Instructional design is the systematic process by which instructional materials are designed developed and delivered Designers must determine the learner's current state and needs define the end goals of the instruction and create an intervention to assist in the transition This book is a complete guide to the process helping readers design efficient effective materials Learn the ins and outs of the ADDIE model Discover shortcuts for rapid design Design for e learning Millennials and MOOCs Investigate methods for emerging avenues of instruction This book does exactly what a well designed course should do providing relevant guidance for anyone who wants to know how to apply good instructional design Eminently practical and fully up to date Rapid Instructional Design is the one stop guide to more effective instruction

Managing Interactive Video/multimedia Projects Robert E. Bergman, Thomas V. Moore, 1990

Government Contracts Herman R. Holtz, 2012-12-06 He who knows and knows that he knows is wise follow him ANCIENT PROVERB During a long career of public service as a government procurement and contracting official I am still surprised to find big successful corporations making the same mistakes that neophytes in government contracting make And this is particularly true in the matter of writing proposals which are the crucial element in most major procurement awards It's true enough as many suspect that the big well known company has something of an edge over the smaller lesser known company competing for any given government contract psychologically at least The typical government executives whether contracting officials or program managers tend to have a bit more faith in the ability of the large company to carry out the program successfully All things being equal then the big company is more likely to get the nod However because the large companies are well aware of that many tend to become fat dumb and happy they try to coast or rest on their laurels That is they get careless about making a strong enough case for themselves in writing their proposals And when they lose often to smaller companies they are both puzzled and outraged They have forgotten that all government procurement is a competition usually both technical and cost competition and that the little guy can win against the big guy if he tries hard enough And especially if the bigger guy is a bit careless and does not put out his best effort
