4. **System level** - study of the structure and function of systems.

5. **Whole body level** - study of the structure and function of the whole body.

Circulatory system

The circulatory system is responsible for the transport of blood in the body.

1. **Cellular level** - study of the structure and function of cells.

2. **Tissue level** - study of the structure and function of tissues.

3. **Organ level** - study of the structure and function of organs.

4. **System level** - study of the structure and function of systems.

5. **Whole body level** - study of the structure and function of the whole body.

SYSTEMS

Systems are groups of organs that work together to perform a specific function.

1. **Cellular level** - study of the structure and function of cells.

2. **Tissue level** - study of the structure and function of tissues.

3. **Organ level** - study of the structure and function of organs.

4. **System level** - study of the structure and function of systems.

5. **Whole body level** - study of the structure and function of the whole body.

Urinary system

The urinary system is responsible for the removal of waste from the body.

1. **Cellular level** - study of the structure and function of cells.

2. **Tissue level** - study of the structure and function of tissues.

3. **Organ level** - study of the structure and function of organs.

4. **System level** - study of the structure and function of systems.

5. **Whole body level** - study of the structure and function of the whole body.

6. **Reproductive system** - study of the structure and function of the reproductive system.

7. **Endocrine system** - study of the structure and function of the endocrine system.

8. **Immune system** - study of the structure and function of the immune system.

9. **Nervous system** - study of the structure and function of the nervous system.

10. **Musculoskeletal system** - study of the structure and function of the musculoskeletal system.

NERVOUS SYSTEM

Neurons

Neurons are the basic units of structure and function of the nervous system.

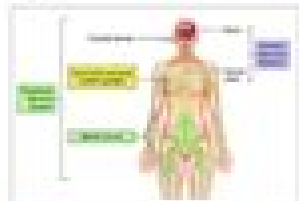

1. **Cellular level** - study of the structure and function of cells.

2. **Tissue level** - study of the structure and function of tissues.

3. **Organ level** - study of the structure and function of organs.

4. **System level** - study of the structure and function of systems.

5. **Whole body level** - study of the structure and function of the whole body.

Neurotransmitters

Neurotransmitters are chemical messengers that transmit signals in the nervous system.

1. **Cellular level** - study of the structure and function of cells.

2. **Tissue level** - study of the structure and function of tissues.
