Ontologies for Agents: Theory and Experiences Valentina Tamma, Stephen Cranefield, Timothy W. Finin, Steven Willmott, 2006-03-30 There is a growing interest in the use of ontologies for multi agent system applications On the one hand the agent paradigm is successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful tool to enable knowledge sharing and a growing number of applications have benefited from the use of ontologies as a means to achieve semantic interoperability among heterogeneous distributed systems In principle ontologies and agents are a match made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately depends on understanding the goals preferences and constraints posed by the user Autonomy is the ability to perform a task with little or no user intervention while proactiveness involves acting autonomously with no need for user prompting Communication but also autonomy and proactiveness depend on knowledge The ability to communicate depends on understanding the syntax terms and structure and the semantics of a language Ontologies provide the terms used to describe a domain and the semantics associated with them In addition ontologies are often complemented by some logical rules that constrain the meaning assigned to the terms These constraints are represented by inference rules that can be used by agents to perform the reasoning on which autonomy and proactiveness are based **Mitsubishi Lancer Evo** Brian Long, 2006 The definitive international history of one of the world's most successful rally cars Covers every Lancer model including all special editions and Dodge Colt Plymouth Valiant Eagle Proton and Hyundai variants from 1973 to date Includes a Foreword by Shinichi Kurihara Mitsubishi's Evo team leader **Torque**, 2008-01 Singapore's best homegrown car magazine with an editorial dream team driving it We fuel the need for speed **The Cumulative Book Index**, 1999 **Moody's International Manual**, 2000 **American Book Publishing Record**, 1999 **Subject Guide to Books in Print**, 2001 **Autocar**, 2006 **The Bulletin**, 1997 **Business India**, 1997 **Torque**, 2007-02 Singapore's best homegrown car magazine with an editorial dream team driving it We fuel the need for speed **Mergent International Manual**, 2002 **Cumulated Index to the Books**, 1999 **F&S Index International Annual**, 1997 **Pakistan & Gulf Economist**, 2008 **Enthusia Professional Racing** Doug Walsh, 2005 BradyGames Enthusia Professional Racing Official Strategy Guide includes the following TOP NOTCH RACING SCHOOL We teach you winning driving techniques take the fastest line through every turn Learn the ins and outs of car settings drivetrain configurations and the Visual Gravity System ALL 211 CARS Kick the tires of every car in the game from street legal runabouts to full on Le Mans champions Our Showroom gives your comprehensive specs for every vehicle COMPLETE COURSE DIRECTORY We diagram every track complete with racing lines acceleration and braking points and expert commentary to lead you through the most challenging stretches EVERY GAME
