Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1977 Groups and Computation II
Larry Finkelstein, William M. Kantor, Consists of papers presented at the workshop on Groups and Computation held at DIMACS The Publishers' Trade List Annual, 1878 **Finite Geometries, Groups, and Computation** Alexander Hulpke, Robert Liebler, Tim Penttila, Akos Seress, 2008-08-22 This volume is the proceedings of a conference on Finite Geometries Groups and Computation that took place on September 4-9 2004 at Pingree Park Colorado a campus of Colorado State University Not accidentally the conference coincided with the 60th birthday of William Kantor and the topics relate to his major research areas Participants were encouraged to explore the deeper interplay between these fields The survey papers by Kantor O'Brien and Penttila should serve to introduce both students and the broader mathematical community to these important topics and some of their connections while the volume as a whole gives an overview of current developments in these fields The Latest and Best of TESS, 1991 Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi-experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies *GED Testing* United States. Indian Health Service, 1973 **Bulletin**, 1923 **Embracing Reason** Daniel Chazan, Sandra Callis, Michael Lehman, 2009-12-16 This book tells a single story in many voices about a serious and sustained set of changes in mathematics teaching practice in a high school and how those efforts influenced and were influenced by a local university It challenges us to rethink boundaries between theory and practice and the relative roles of teachers and university faculty in educational endeavors **The Software Encyclopedia**, 1988
