administrators all too many superintendents and principals are guilty of placing the almighty dollar first their own reputations second and students a poor third The writer places the blame for all of this failure on the heads of school administrations while not excusing the culpability of teachers and parents for believing those who try to convince them that education is available for everyone if the correct magic curricula programs methods etc are followed carefully and proper testing is done correctly Public education is still only educating those students who come to school properly motivated or who are fortunate enough to find those few teachers who are willing to buck the system and teach the children not the tests the curricula or the currently popular and ever changing programs In answer to the inevitable questions of whether or not the system is worth preserving and what might be done to make a serious attempt at educating every child the author proposes some interesting and thought provoking strategies Radically different than those proposed by the Bush administration these strategies are possible on any level from a single classroom to an entire nation Saving America s Schools is a must read for every serious educator every parent and every concerned citizen in this country
