collection of reprinted Featured Reviews published in Mathematical Reviews MR in 1995 and 1996 makes widely available informed reviews of some of the best mathematics published recently. Featured Reviews were introduced in MR at the beginning of 1995 in part to provide some guidance to the current research level literature. This work identifies some of the best new publications papers and books that are expected to have a significant impact on the area of pure or applied mathematics with which researchers are concerned. All of the papers reviewed here contain interesting new ideas or applications a deep synthesis of existing ideas or any combination of these. The volume is intended to lead the user to important new research across all fields covered by MR.
