There are 50 cards in this packet covering all of Algebra 1. Linear equations, quadratics, exponents, and real life word problems are just a few of the topics covered. There are even blank cards for teachers for their own questions.

I use these cards a few different ways in my classroom depending on the mix of students.

- Play Solitaire War:**
Great for fun! Divide your students into two teams. Each team gets 10 cards each. For each turn, they each draw a card. They then have to solve both or one of the cards. If they draw a duplicate, they can skip. If they draw a duplicate, they can skip. If they draw a duplicate, they can skip. If they draw a duplicate, they can skip.
- Post ten cards around room like a scavenger hunt:**
I'll choose 10 based on the subject and make students find the 10 cards around the room. Give each student a notebook + grade for accuracy.
- Give ONE card to each student in class:**
Everyone solves their problem, then goes around and explains their problem. At end of lesson, students would need to problems solved with their own explanation/ work. If you have 50 kids.
