A Primer on Earth Pollution: Pollution Types and Disposal J. Senthil Kumar, P. Ponmurugan, A. Vinoth Kanna, 2020-12-23 A Primer on Earth Pollution: Pollution Types and Disposal is an encyclopedia of important research articles and short essays on pollution. Chapters in the initial half provide information about a wide variety of pollutants: dyes and microplastics and contributing factors; thermal pollution and the impact of GM plants; for instance. Each chapter explains the nature of polluting agents and presents notes and references on preventive measures. Notes on the associated clinical complications due to exposure are also provided where applicable, such as the case of MDR bacteria in marine environments. The latter chapters of the book cover the biotechnology of medical waste disposal using microbes as well as nanotechnology used for limiting the spread of COVID-19. The volume is a handy reference for students and trainees in the field of environmental science as it brings a balance of basic and applied information on the subject of pollution.

Numerous hands-on tools and techniques demonstrate the effectiveness of content area instruction for students in a wide variety of school settings, particularly English language learners, struggling readers, and other special populations of students. A wealth of charts, graphs, and lesson plans give clear examples of academic language literacy strategies in action. The appendices, a key component of the practical applications developed in the text, include a glossary, exemplary lessons that address key content areas, and a Grammar Handbook. In this era of increased accountability coupled with rapid demographic change and challenges to traditional curricula and pedagogical methods, educators will find this book to be a great resource.
