complete with source references *Curing Medicare* Andy Lazris, 2016-06-14 Andy Lazris MD is a practicing primary care physician who experiences the effects of Medicare policy on a daily basis. As a result, he believes that the way we care for our elderly has taken a wrong turn and that Medicare is complicit in creating the very problems it seeks to solve. Aging is not a disease to be cured; it is a life stage to be lived. Lazris argues that aggressive treatments cannot change that fact but only get in the way and decrease quality of life. Unfortunately, Medicare's payment structure and rules deprive the elderly of the chance to pursue less aggressive care, which often yields the most humane and effective results. Medicare encourages and will pay more readily for hospitalization than for palliative and home care. It encourages and pays for high-tech assaults on disease rather than for the primary care that can make a real difference in the lives of the elderly. Lazris offers straightforward solutions to ensure Medicare's solvency through sensible, cost-effective plans that do not restrict patient choice or negate the doctor-patient relationship. Using both data and personal stories, he shows how Medicare needs to change in structure and purpose as the population ages, the physician pool becomes more specialized, and new medical technology becomes available. *Curing Medicare* demonstrates which medical interventions, medicines, tests, procedures work and which can be harmful in many common conditions in the elderly, the harms and benefits of hospitalization, the current culture of long-term care, and how Medicare often promotes care that is ineffective, expensive, and contrary to what many elderly patients and their families really want.

Mobile Integrated Healthcare MedStar Mobile Healthcare, MedStar Mobile Healthcare, 2016 The healthcare landscape in the United States is evolving rapidly but has largely ignored EMS until recently. As the country focuses on cost containment and more appropriate methods to deliver services as a result of healthcare reform, EMS will need to undergo dramatic change to fill a new role in the healthcare system. The current traditional delivery method for EMS is financially unsustainable and will soon not be a viable option for care. EMS has a choice to make: adapt to the new environment or be left behind. A viable alternative to the current structure of EMS is Mobile Integrated Healthcare (MIH), community-based health management that is fully integrated with the overall health system. Various programs like this have appeared across the United States, but a definitive resource that describes how to successfully implement such a program has not been available. *Mobile Integrated Healthcare Approach to Implementation* fills this void by serving as a reference not only to the EMS community but also to other medical professionals working toward implementation of a successful MIH program. *Mobile Integrated Healthcare Approach to Implementation* provides a step-by-step approach for the identification of community needs, forming the appropriate partnerships, selection of staff, acquiring resources, patient identification, and overcoming hurdles to a successful program. Examples from successful programs across the country are included. The author team of *Mobile Integrated Healthcare Approach to Implementation* has developed and implemented a functioning successful program. Their experiences with community partners and other healthcare specialists provide a broad-based view of the future of EMS in the healthcare industry. *Mobile Integrated Healthcare Approach to Implementation* is

written by leaders in the field of EMS who are committed to guiding the successful evolution of EMS Their approach to integration should be considered by EMS management hospital based social workers and community partners such as county health authorities homeless coalitions and psychiatric services The type of care EMS providers give needs to evolve with the changing landscape of healthcare This text describes how healthcare professionals and community partners can work together to facilitate that change and define a successful MIH program
