3. Fill a wash pan larger than the element with a non-flammable cleaning solvent; then dip the element in the solvent and wash it.

**NOTE:** Foam Air Filter Cleaner and Foam Air Filter Oil are available from Arctic Cat.

4. Dry the element.
5. Put the element in a plastic bag; then pour in air filter oil and work the oil into the element. Insert the forming spring into the element with the closely wrapped end of the spring toward the open end of the element.

### CAUTION

A torn air filter element can cause damage to the A/V engine. Dirt and dust may get inside the engine if the element is torn. Carefully examine the element for tears before and after cleaning it. Replace the element with a new one if it is torn.

6. Chase any dirt or debris from inside the air element. Be sure no dirt enters the carburetor.
7. Place the filter assembly in the air filter housing making sure it is properly positioned and properly seated with the filter element straight in the housing.
