Plant Phenotyping and Phenomics for Plant Breeding Gustavo A. Lobos,Anyela V. Camargo,Alejandro del Pozo,Jose L.

Araus, Rodomiro Ortiz, John H. Doonan, 2018-08-16 As a consequence of the global climate change both the reduction on yield potential and the available surface area of cultivated species will compromise the production of food needed for a constant growing population There is consensus about the significant gap between world food consumption projected for the coming decades and the expected crop yield improvements which are estimated to be insufficient to meet the demand The complexity of this scenario will challenge breeders to develop cultivars that are better adapted to adverse environmental conditions therefore incorporating a new set of morpho physiological and physico chemical traits a large number of these traits have been found to be linked to heat and drought tolerance Currently the only reasonable way to satisfy all these demands is through acquisition of high dimensional phenotypic data high throughput phenotyping allowing researchers with a holistic comprehension of plant responses or Phenomics Phenomics is still under development This Research Topic aims to be a contribution to the progress of methodologies and analysis to help understand the performance of a genotype in a given environment

Managing Agricultural Greenhouse Gases Mark Liebig, A.J. Franzluebbers, Ronald F Follett, 2012-06-08 In 2002 the USDA Agricultural Research Service ARS developed a coordinated national research effort called GRACEnet Greenhouse gas Reduction through Agricultural Carbon Enhancement network to provide information on the soil C status and GHG emission of current agricultural practices and to develop new management practices to reduce net GHG emission and increase soil C sequestration primarily from soil management Managing Agricultural Greenhouse Gases synthesizes the wealth of information generated from the GRACEnet project in over 30 ARS locations throughout the US and in numerous peer reviewed articles Although GRACEnet is an ARS project contributors to this work include a variety of backgrounds and reported findings have important international applications For example many parts of the world possess similar ecoregions to the U S e g northern Great Plains is similar to the Argentina Pampas and Ukraine Steppe

Ferroelectric Domain Walls Jill Guyonnet, 2014-04-08 Using the nano metric resolution of atomic force microscopy techniques this work explores the rich fundamental physics and novel functionalities of domain walls in ferroelectric materials the nano scale interfaces separating regions of differently oriented spontaneous polarization Due to the local symmetry breaking caused by the change in polarization domain walls are found to possess an unexpected lateral piezoelectric response even when this is symmetry forbidden in the parent material This has interesting potential applications in electromechanical devices based on ferroelectric domain patterning Moreover electrical conduction is shown to arise at domain walls in otherwise insulating lead zirconate titanate the first such observation outside of multiferroic bismuth ferrite due to the tendency of the walls to localize defects The role of defects is then explored in the theoretical framework of disordered elastic interfaces possessing a characteristic roughness scaling and complex dynamic response It is shown that the heterogeneous disorder landscape in ferroelectric thin films leads to a breakdown of the usual

self affine roughness possibly related to strong pinning at individual defects Finally the roles of varying environmental conditions and defect densities in domain switching are explored and shown to be adequately modelled as a competition between screening effects and pinning **Nuclear Science Abstracts** ,1964 Real World Data Mining Applications Mahmoud Abou-Nasr,Stefan Lessmann,Robert Stahlbock,Gary M. Weiss,2014-11-13 Data mining applications range from commercial to social domains with novel applications appearing swiftly for example within the context of social networks The expanding application sphere and social reach of advanced data mining raise pertinent issues of privacy and security Present day data mining is a progressive multidisciplinary endeavor This inter and multidisciplinary approach is well reflected within the field of information systems The information systems research addresses software and hardware requirements for supporting computationally and data intensive applications Furthermore it encompasses analyzing system and data aspects and all manual or automated activities In that respect research at the interface of information systems and data mining has significant potential to produce actionable knowledge vital for corporate decision making The aim of the proposed volume is to provide a balanced treatment of the latest advances and developments in data mining in particular exploring synergies at the intersection with information systems It will serve as a platform for academics and practitioners to highlight their recent achievements and reveal potential opportunities in the field Thanks to its multidisciplinary nature the volume is expected to become a vital resource for a broad readership ranging from students throughout engineers and developers to researchers and academics Living Along Gradients: Past, Present, Future Ulrich Bathmann,Hendrik Schubert,Elinor Andrén,Laura Tuomi,Teresa Radziejewska,Karol Kulinski,Irina Chubarenko,2020-02-24 *Ecology and Behaviour of Free-Ranging Animals Studied by Advanced Data-Logging and Tracking Techniques* Thomas Wassmer,Dennis Murray,Stan Boutin,Andreas Fahlman,Frants Havmand Jensen,2020-06-15 **The Vacuum Cleaner** Carroll Gantz,2012-10-05 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor performed mostly by women Mechanical carpet sweepers were replaced by manual suction cleaners which in turn were replaced by electric vacuum cleaners in the early 20th century Innovative inventors who improved vacuum cleaners as electricity became commonly available made these advances possible Many early manufacturers failed but some such as Bissell Hoover Eureka and others became household names as they competed for global dominance with improved features performance and appearance This book describes the fascinating people who made this possible as well as the economic cultural and technological contexts of their times From obscure beginnings 200 years ago vacuum cleaners have become an integral part of modern household culture **Scientific and Technical Aerospace Reports** ,1992
