New Perspectives on Safavid Iran Colin P. Mitchell, 2011-03-03 Dedicated to the renowned Safavid historian Roger

Savory this book brings together a collection of studies on the Safavid state of Iran 1501-1722 from the perspectives of political, social, literary and artistic history. Savory, a doyen of Safavid studies in the 1960s and 1970s, was responsible for expanding and popularizing the study of Iran in the 16th and 17th century. To celebrate this legacy, well-established scholars of medieval and early modern Iran have contributed specific studies reflecting an array of research interests and specializations which include critical re-examinations of issues of gender, literature, art and architecture, cultural and linguistic currents, illustrated historical chronicles and courtly and administrative practices under the Safavid dynasty. This unique compilation is indicative of a growing interest in Iran and Iranian studies in both the academic and public spheres and as such contains a number of new perspectives which will serve to supplement and re-interpret the existing corpus of Safavid scholarly literature to date. It will be an important text for scholars of world history and Middle East studies as well as to historians in general.

Strategically important metals Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-05-17. Although most strategic metal reserves are unlikely to run out over the coming decades, the perception of scarcity of certain minerals and metals may lead to increased speculation and volatility in price and supply. Strategically important metals are vital to advanced manufacturing, low carbon technologies and other growing industries and the Government should provide reliable information on potential resource risks in a coordinated and coherent way. The UK also exports large quantities of scrap metal and waste electrical and electronic equipment (WEEE) often to developing countries. This metal not only is a potential resource for the UK but it is also an example of the UK exporting its environmental problems elsewhere. There are also concerns about the illegal export of WEEE which is often labelled as second hand equipment for re-use and calls for safeguards to be put in place. Despite a rate of 90% by weight metal recycling in the UK, it is of great concern that some strategic metals are likely to be lost in the 10% not being recycled. The report recommends improving existing legislation to ensure companies implement requirements on reporting non-financial information such as human rights and health and safety issues, an evaluation by the Government of the potential for introducing similar legislation to that in the US whereby companies are required to produce detailed reports on conflict minerals that they use. This report also brings the alleged activities of large dealers on the London Metals Exchange to the attention of the Office of Fair Trading. Finally, the report looks at domestic extraction and says planning regulations should not unnecessarily restrict the use of significant potential reserves and that domestic mining could alleviate risks associated with sourcing metals from external supply monopolies. In parallel, the Government has to invest in research to ensure that future domestic mining has the least possible environmental impact.

The PKK Doctor Paul White, 2015-08-15. The Kurdistan Workers Party (PKK) is infamous for its violence. The struggle it has waged for Kurdish independence in southeastern Turkey has cost in excess of 40,000 lives since 1984. A less known fact, however, is that the PKK now embraces a non-violent end to the conflict with its leader Abdullah Öcalan having ordered a ceasefire and engaging in a negotiated peace.

with the Ankara government Whether these tentative attempts at peacemaking mean an end to the bloodshed remains to be seen but either way the ramifications for Turkey and the wider region are potentially huge Charting the ideological evolution of the PKK as well as its origins aims and structure Paul White provides the only authoritative and up to date analysis of one of the most important non state political players in the contemporary Middle East
