Structural Dynamic Analysis with Generalized Damping Models Sondipon Adhikari, 2013-12-11 Since Lord Rayleigh introduced the idea of viscous damping in his classic work *The Theory of Sound* in 1877 it has become standard practice to use this approach in dynamics covering a wide range of applications from aerospace to civil engineering. However in the majority of practical cases this approach is adopted more for mathematical convenience than for modeling the physics of vibration damping. Over the past decade extensive research has been undertaken on more general non viscous damping models and vibration of non viscously damped systems. This book along with a related book *Structural Dynamic Analysis with Generalized Damping Models Identification* is the first comprehensive study to cover vibration problems with general non viscous damping. The author draws on his considerable research experience to produce a text covering dynamics of viscously damped systems, non viscously damped single and multi degree of freedom systems, linear systems with non local and non viscous damping, reduced computational methods for damped systems and finally a method for dealing with general asymmetric systems. The book is written from a vibration theory standpoint with numerous worked examples which are relevant across a wide range of mechanical, aerospace and structural engineering applications.

Mammography Wars Asia Friedman,2023-06-16 Winner of the 2024 Outstanding Book Award Social Problems Theory Division Society for the Study of Social Problems Mammography is a routine health screening performed forty million times each year in the United States yet it remains one of the most deeply contested topics in medicine with national health care organizations supporting conflicting guidelines In Mammography Wars sociologist Asia Friedman examines cultural and medical disagreements over mammography At issue is whether to screen women under age fifty which is rooted in deeper questions about early detection and the assumed linear and progressive development of breast cancer Based on interviews with doctors and scientists interviews with women ages 40 to 50 and newspaper coverage of mammography Friedman uses the sociology of attention to map the cognitive structure of the mammography wars offering insights into the entrenched nature of debates over mammography that often get missed when applying a medical lens Friedman s analysis also suggests the sociology of attention s unique potential for analyzing cultural conflicts beyond mammography and even beyond medicine
