Clinical Neuropsychology of Attention Adriaan H. Zomerén,Wiebo H. Brouwer,1994 Written by a clinical neuropsychologist and a cognitive psychologist this work presents an integrated view of the multi faceted concept of attention In neuropsychology attention has different meanings depending on the nature of the neurological disorder and the theoretical background of the investigator To provide insight into these theoretical backgrounds this volume opens with a discussion of psychological and neurobiological theories of attention The book does not adopt a particular theoretical orientation but tries to clarify the various conceptualizations of attention that are encountered in the literature Throughout the book critically reviews the literature on attentional deficits in frequently occurring neurological conditions such as traumatic brain injury Alzheimer s disease Parkinson s disease and epilepsy This material is organized according to the types of tasks used to investigate attention such as tests of focused divided and sustained attention The book concludes with three chapters on topics that underline its practical aim assessment of attention the relationship between test performance and

everyday activities and the rehabilitation of impairments of attention This comprehensive work will be invaluable to neuropsychologists neurologists clinical psychologists gerontologists and rehabilitation specialists **Handbook of Veterinary Neurology - E-Book** Michael D. Lorenz, Joan Coates, Marc Kent, 2010-12-07 Handbook of Veterinary Neurology provides quick access to vital information on neurologic conditions in a wide range of species including canine feline bovine caprine equine ovine and porcine A problem oriented approach makes it easy to diagnose and treat neurologic problems in small and large animals The coverage of disorders by problem not by established disease diagnosis emulates how animals present to the veterinary hospital and simplifies the formulation of a correct diagnosis Within each chapter discussions of neurologic disease include a review of the localization criteria and the diseases that can cause that problem plus treatment and surgical techniques Lead author Michael D Lorenz brings decades of experience to neurologic assessment using a diagnostic approach that requires minimal knowledge of neuroanatomy A problem based approach is organized by presenting sign rather than by condition guiding you to logical conclusions regarding diagnosis and treatment Algorithms diagram the logic necessary to localize lesions and to formulate diagnostic plans Coverage of current diagnostic techniques includes the use of diagnostic tools such as radiology spinal fluid analysis electrodiagnosis and MR imaging Case histories in each chapter present a problem and the results of the neurologic examination then ask you to solve the problem by localizing the lesion listing probable causes and making a diagnostic plan Answers are provided at the back of the book A consistent format for each case history includes signalment history physical examination findings and neurologic examination A comprehensive appendix describes species and breeds that have a congenital predisposition for particular neurologic diseases Extensive references make it easy to pursue in depth research of more advanced topics A companion website includes 20 narrated video clips with accompanying PowerPoint slides that correlate to the case histories in the book covering neurologic assessment and clinical problems such as paresis of one limb tetraparesis stupor seizures ataxia of the head and limbs and cranial nerve disorders Two new co authors Jean Coates and Marc Kent board certified in neurology enhance the credibility of this edition A full color design and numerous illustrations include enhanced images of neuroanatomy and pathology

Physical Education, Health And The Study Of Sports Dr. A.K. Uppal, Dr. G.P.
