Discipline Problems Tadashi Dozono,2024-05-07 Angel a Black tenth grader at a New York City public school self identifies as a nerd and likes to learn But she s troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas presenting a sugar coated image of the United States that is at odds with her everyday experience The history I learned in school is simpler she says The world I live in is a lot more complex Angel like every student interviewed in Discipline Problems has been identified by teachers as a troublemaker a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she s taught speak to her curiosity and insight crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools she exposes the shortcomings of her classrooms academic environments by challenging both the content and the methods of her education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the

curiosity intellect and knowledge of marginalized learners

Integrate the Internet Across the Content Areas Lynn Van Gorp,2007-07-01 Bring your classroom into the 21st century using the Internet Useful strategies An annotated list of teacher tested websites and easy to follow lesson plans for

all content areas make this resource a perfect guide for integrating the Internet into the curriculum Student activities student research suggestions and 24 model lessons that clearly demonstrate how to effectively use websites are provided along with information on teacher and student resource sites The open ended activities help students develop thinking skills and learn to search the Web and evaluate websites Topics covered include computer management differentiation safety issues searching the Internet copyright guidelines and more The Teacher Resource CD provided includes reproducible teacher resource materials 296pp

For the Love of Learning Kristin Phillips, 2022-08-16 An illuminating and refreshing memoir about a year in the life of an elementary school principal outlining the joys and challenges for teachers and students of education today Outside of home children spend more time at school than anywhere and teachers play an important role in their young lives Teachers inspire nudge support and help students through many difficulties both academic and developmental And yet we almost never hear about what's really happening in school Kristin Phillips taught grade school for years before becoming a principal helping to guide not just students but also staff through better learning Here she takes us through a school year from the excitement of fall through the long days of winter and into the renewed energy that comes with spring Through her eyes we experience the increasingly complex education system children with disruptive behaviours teachers attempting new practices some more successfully than others and even parents who need a little help parenting As she walks us through this year we're introduced to the many problems that she faced but also those of the students and teachers she worked with What's the best way to address bullying in the classroom and school yard What do you do with a five year old who won't stop cursing in class And importantly how do we ensure all students are learning And these are just the concerns Phillips faced during school hours At home she reckoned with her own family's problems Recently divorced Phillips shares the ups and many downs of parenting three teenagers one of whom at times suffers from debilitating mental health issues With the realities of Covid 19 the importance of schools and their vital role for children and all of society has never been clearer Phillips takes us into the classrooms hallways and principal's office revealing the innovations happening in our schools and also the areas where education can do better With honesty and compassion Phillips gives a human face to the very real challenges educators work to overcome one year and one student at a time

Raising Black Students' Achievement Through Culturally Responsive Teaching Johnnie McKinley, 2011-03-30 In this book Johnnie McKinley presents the results of her in depth study of a group of teachers in grades 3 thru 8 who managed to radically narrow the achievement gap between their black and white students by using a set of culturally responsive strategies in their classrooms McKinley uses the educators own words and illustrative virtual walkthroughs of lessons in action to examine these strategies in detail In addition the book includes An overview of the research literature on effective responses to the achievement gap Instructions for conducting classroom walkthroughs including a series of feedback forms that teachers can use to conduct walkthroughs in their schools and A comprehensive guide to the author's Teaming for Culturally Responsive Classrooms

TCRC model an innovative multistep framework for assessing the cultural responsiveness of teaching strategies in schools Educators have been struggling for decades to remedy the disparity in academic outcomes between black and white students This book shows how one remarkable group of teachers harnessed the power of culturally responsive teaching to do just that By following the path outlined in *Raising Black Students Achievement Through Culturally Responsive Teaching* you too can help your black students to become engaged self confident and successful learners **School Library Journal** ,2005

My iPad for Kids Sam Costello,2012-06-04 Step by step instructions and corresponding step number callouts on photos show you exactly what to do Help when you run into problems or limitations of your iPad or its apps and you need to figure out what to do Tips and Notes to help you get the most out of your iPad and its apps Costello Full color step by step tasks walk you through learning how to use your iPad for home school and just for fun Learn how to Safely surf the Internet on the iPad to do research for school and find interesting facts Use email texting and chatting apps to stay in touch with friends family and teachers Have fun or do group projects for school using FaceTime and Skype video chatting Use the iPad in school and for homework Four chapters of suggestions for grade specific apps 4th through 7th grade to help you excel in the classroom Use the built in Music app so you can rock out to your favorite tunes Watch movies and TV shows from iTunes and videos on YouTube only when homework is done of course Use iPad s built in cameras to take photos and video of you and your friends Use the Photo Booth app to make them even more interesting or a little crazy Set new high scores playing the tens of thousands of great games available at the App Store Discover great apps for school or just for fun through recommendations in nearly every chapter Parents can feel more secure thanks to special tips that help kids use the Internet safely and responsibly Become your own tech support team by learning to maintain and solve problems with your iPad including tips on restarting backing up and cleaning the iPad Includes coverage of the latest iPad technologies including iOS 5 1 and 4G LTE Democratic Education in Practice Matthew Knoester,2015-04-25 The Mission Hill School founded by MacArthur Award winner Deborah Meier and colleagues in 1997 is a small public school that has rethought almost everything about the process of teaching and learning Beyond richly describing and evaluating this high achieving school the author argues that democratic education is increasingly difficult in this era of testing and standardization and that a school such as Mission Hill must be continually thoughtful innovative and courageous in counteracting systemic inequality This in depth examination is essential reading for anyone interested in how to better understand seemingly intractable problems related to urban public education in the United States Book Features An exemplary model of democratic education that shows the inner workings of a largely teacher governed school A rare example of an urban school implementing Dewey influenced progressive pedagogy In depth descriptions of an anti racist and culturally relevant pedagogy and curriculum A close examination of successful practices including shared decision making intensive problem solving and looking at student work Matthew Knoester is a National Board Certified Teacher and former teacher at the Mission Hill School in Boston He

received his Ph D in Curriculum and Instruction from the University of Wisconsin Madison and is currently Assistant Professor of Education at the University of Evansville Matthew Knoester has done us an enormous favor by showing us in detail what could be one example of how schools can be the building blocks for democracy recreating community for all to taste feel hear and see From the Foreword by Deborah W Meier This is exactly the kind of book that is so necessary at this time Schools can be respectful responsive and caring places Matthew Knoester gives us a detailed picture of such a school If more people would read books such as this the national debate on education would be all the better for it Michael W Apple John Bascom Professor of Curriculum and Instruction and Educational Policy Studies University of Wisconsin Madison Knoester s account of the Mission Hill School captures the habits of mind needed if public schools are to be truly democratic in spirit and in practice centered on the children and as Deborah Meier so powerfully advocates protected from those policies and social forces that accept and perpetuate disengagement and inequality in our children s education Linda McSpadden McNeil Professor of Education Rice University author of Contradictions of School Reform To those who have never seen the Mission Hill School in Boston it may sound like a magical place The good news is that it is real and Knoester shows us through his compelling narrative how and why they have been able to achieve so much For educators students and parents this book will be a source of inspiration At a time when our policymakers and many so called reformers are actively undermining support for public education this important book will serve as a reminder that we can do a much better job at educating all children Pedro Noguera Executive Director Metropolitan Center for Urban Education New York University

Popular Science ,1909-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **The Snow Cone Diaries** Juan Valdez,2014-05-15 The content in this work is fiction fiction in the sense that the main character through which the eyes of this metaphysical and philosophical journey is viewed Charlie is not a real character nor are his counterparts and foils through which he explores various topics such as love the meaning of existence or the origins of the cosmos and how our understanding of these abstract ideas have evolved since the dawn of civilization But like any work of fiction the characters do have some basis in real experience from which of course nothing can be created The intent of the work is to explore the foundations and evolution of knowledge and the boundaries between reason and faith boundaries which from the authors perspective are not quite as clear as some might have us believe And the point of going through the exercise the purpose as it were is not only for the author to come to a better understanding of how all our modern branches of science hang together how they have come to be given their socio political and historical context but also for others to share in his journey and perhaps learn something along the way Since the birth of language and thought even going back thousands of years and even prior to the dawn of civilization itself mankind has attempted to answer two fundamental questions questions that have spurred countless

creative forces and branches of thought over the centuries namely who we are and from whence we came The answers to these questions no matter what race religion or creed the seeker might be or what philosophy or religion they might adhere to are inextricably linked to each other This journey of trying to understand our place in the world and the origins of the universe itself is an ageless quest that in many respects distinguishes mankind from the rest of the creatures on the planet Furthermore this very same quest to answer the same questions fuels not only scientific development but also is the basis for theology and religion both approaching the same set of questions with a different set of tools and with a different mindset but both trying to answer the same set of basic questions as to who we are and how we got here From the authors perspective in order to answer these questions effectively in the Information Age we should have at least some understanding of the history of our answers to these questions as they have evolved over time For we all build our collective knowledge on those that have come before us whether we recognize this or not And in turn that in building this bridge a common metaphor used throughout the work we must leverage the tool of metaphysics a term originally coined by Aristotle but in the context of this work implies a level of abstraction that sits above physics as we understand it in todays world but also provides a conceptual underpinning to all of the branches of knowledge that collectively make up our understanding of the world and our place in it In doing so it is the authors hope that we can not only come to a more complete and fuller understanding of the answers to these basic human questions that have plagued mankind since time immemorial but also at the same time perhaps develop a deeper understanding of the problems of life in the Information Age and how we might best approach them or cope with them in way that not only benefits ourselves as individuals but to society as a whole to which our individual well being depends upon whether or not we recognize it or not

Ancient Science Jim Wiese,2003-04-01 Dig into the science of ancient times and unearth amazing discoveries Have you ever wondered where paper comes from who made the first known maps or how the ancient Egyptians were able to build the pyramids Would you like to make your own sundial discover how to detect earthquakes or learn to write in hieroglyphics Are you looking for great ideas for your next science fair project If you answered Yes to any of these questions then Ancient Science is for you From Greek lighthouses and Roman bridges to Chinese kites and Mesopotamian soap you ll investigate some of the greatest scientific discoveries and the people who introduced them to the world Dozens of fun packed activities help you see for yourself how the earliest humans cultivated plants why instruments make different sounds how fireworks get their explosive power and much more All of the projects are safe and easy to do and all you need is everyday stuff from around the house So step back in time and take an amazing journey with Ancient Science

Helping Gifted Children Soar Carol Strip Whitney,Gretchen Hirsch,2000 A guide to the many issues gifted children face that offers parents and teachers advice on identifying gifted children helping them get the most of classroom programs forming parent support groups meeting social and emotional needs and choosing the appropriate curriculum

These 6 Things Dave Stuart Jr.,2018-06-28 Streamline literacy instruction while increasing

student achievement Dave R Stuart Jr's work is centered on a simple belief all students and teachers can flourish Yet that seemingly simple goal can feel unattainable when teachers are expected to teach core content within the disciplines and improve literacy in their classrooms How can teachers and students flourish under so much pressure Stuart's advice Take a deep breath and refocus on six known best practices establish and strengthen key beliefs then build knowledge and increase reading writing speaking and listening and argumentation in every content area every day These 6 Things is all about streamlining your practice so that you're teaching smarter not harder and kids are learning doing and flourishing in ELA and content area classrooms In this essential new resource teachers will receive Proven classroom tested advice delivered in an approachable teacher to teacher style that builds confidence Practical strategies for streamlining instruction in order to focus on key beliefs and literacy building activities Solutions and suggestions for the most common teacher and student hang ups Numerous recommendations for deeper reading on key topics In addition to teaching English and world history for more than a decade Stuart is well known for his blog DaveStuartJr.com which has over 35 000 visitors each month This popular resource has been a beacon of light for more than 10 000 subscribers who refuse to freak out about the everyday challenges of teaching in a high stakes era He presents professional development workshops and institutes for schools around the United States and offers a number of online learning tools and experiences on his website
