*Environmental and Natural Resource Economics* Jonathan M. Harris, Brian Roach, 2021-11-28 Environmental issues are of fundamental importance and a broad approach to understanding the relationship between the human economy and the natural world is essential. In a rapidly changing policy and scientific context this new edition of *Environmental and Natural Resource Economics* reflects an updated perspective on modern environmental topics. Now in its fifth edition this textbook includes enhanced and updated material on energy, climate change, greening the economy, population, agriculture, forests and water, reflecting the greater urgency required to solve the big environmental problems in these areas. It introduces students to both standard environmental economics and the broader perspective of ecological economics, balancing analytical techniques of environmental economics topics with a global perspective on current ecological issues such as population growth, global climate change and green national income accounting. Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment. This perspective combined with its emphasis on real world policies is particularly appealing to both instructors and students. This is the ideal text for undergraduate classes on environmental, natural resource and ecological economics and postgraduate courses on environmental and economic policy. **Economics for Lawyers** Richard A. Ippolito, 2012-01-12 Whether dealing with contracts, tort actions or government regulations, lawyers are more likely to be successful if they are conversant in economics. *Economics for Lawyers* provides the essential tools to understand the economic basis of law. Through rigorous analysis illustrated with simple graphs and a wide range of legal examples, Richard Ippolito focuses on a few key concepts and shows how they play out in numerous applications. There are everyday problems: What is the social cost of legislation enforcing below market prices, minimum wages, milk regulation and noncompetitive pricing? Why are matinee movies cheaper than nighttime showings? And then there are broader questions: What is the patent system's role in the market for intellectual property rights? How does one think about externalities like airport noise? Is the free market a regulated solution or tort law the best way to deliver the
