

10-1

Practice (continued)

Form G

Areas of Parallelograms and Triangles

18. A company wants to paint its logo on the side of a building. The entire area needs to be covered with a primer. The two triangular areas will be painted red, the rectangle containing the company's name will be white, and the rest of the parallelogram will be yellow.

- Find the area for each different color.
- Find the area that must be painted with primer.

Handwritten notes:
 Area of parallelogram = 1/2 * base * height
 = 1/2 * 10 * 8 = 40 sq ft
 Area of rectangle = length * width
 = 4 * 4 = 16 sq ft
 Area of two triangles = 40 - 16 = 24 sq ft

19. A scale drawing of the side view of a house is shown at the right. Find the total area (in square inches) of the side of the house in the drawing.

20. **Open-Ended** Using graph paper, draw a figure with area 42 units² made up of a parallelogram and a triangle.

Coordinate Geometry Find the area of a polygon with the given vertices.

- $A(2, 2), B(5, 2), C(3, -1), D(0, -1)$
- $A(1, 4), B(-2, -2), C(-7, -2), D(-4, 4)$
- $A(5, -3), B(-1, -3), C(-1, 2), D(5, 6)$
- $A(5, 0), B(5, 8), C(-1, 7), D(-1, -6)$

Find the area of each figure.

28. **Reasoning** A parallelogram has a height of 6 units and a corresponding base of 7 units. What is the area of each triangle formed when one diagonal of the parallelogram is drawn? What is the area of each small triangle formed when two diagonals are drawn?
29. A parallelogram has sides 24 m and 5 m. The height corresponding to a 24-m base is 4 m. What is the height corresponding to a 5-m base?

geometry Whether you re a student or just looking to expand your brain power this book is your go to resource for everything geometry

Materials Processing Lorraine F. Francis, 2024-04-25 *Materials Processing A Unified Approach to Processing of Metals Ceramics and Polymers Second Edition* is the first textbook to bring the fundamental concepts of materials processing together in a unified approach that highlights the overlap in scientific and engineering principles It teaches students the key principles involved in the processing of engineering materials specifically metals ceramics and polymers from starting or raw materials through to the final functional forms Its self contained approach is based on the state of matter most central to the shaping of the material melt solid powder dispersion and solution and vapor With this approach students learn processing fundamentals and appreciate the similarities and differences between the materials classes This fully updated edition includes expanded coverage on additive manufacturing as well as adding a new section on machining The organization has been modified and a greater emphasis has been placed on the fundamentals of processing and manufacturing methods This book can be utilized by upper level undergraduates and beginning graduate students in Materials Science and Engineering who are already schooled in the structure and properties of metals ceramics and polymers and are ready to apply their knowledge to materials processing It will also appeal to students from other engineering disciplines who have completed an introductory materials science and engineering course Includes comprehensive coverage on the fundamental concepts of materials processing Provides coverage of metals ceramics and polymers in one text Presents examples of both standard and newer additive manufacturing methods throughout Gives students an overview on the methods that they will likely encounter in their careers

Basic Engineering Mathematics John Bird, 2013-06-17 Unlike most engineering maths texts this book does not assume a firm grasp of GCSE maths and unlike low level general maths texts the content is tailored specifically to the needs of engineers The result is a unique book written for engineering students that takes a starting point below GCSE level Basic Engineering Mathematics is therefore ideal for students of a wide range of abilities especially for those who find the theoretical side of mathematics difficult Now in its fifth edition Basic Engineering Mathematics is an established textbook with the previous edition selling nearly 7500 copies All students that require a fundamental knowledge of mathematics for engineering will find this book essential reading The content has been designed primarily to meet the needs of students studying Level 2 courses including GCSE Engineering the Diploma and the BTEC First specifications Level 3 students will also find this text to be a useful resource for getting to grips with essential mathematics concepts because the compulsory topics in BTEC National and A Level Engineering courses are also addressed
