Introducing The Smartbook of Neurosurgery is a concise informative useful and evidence based guide for residents young neurosurgeons and health care professionals interested in neurosurgery This book has been thought about the most common challenging situations and questions that come during the daily activities as a resident or young neurosurgeon This book contains over 2 000 questions divided into 8 chapters and these chapters include basic translational clinical and surgical scenarios The question and answer for the topics Neuroanatomy Neurophysiology neurological surgery Neuropharmacology Neuroradiology cranial and brain surgery Neuroradiology Neuropathology Neurology Pediatric Neurosurgery Spine Surgery Peripheral Nerve Tips and Tricks on the cranial approach intracranial tumor neurosurgery endoscopic neurosurgery acromegaly cerebrovascular surgery and cranial trauma neurosurgery are clearly defined as The Smartbook of Neurosurgery This book represents a resource for on the fly consults on a busy hospital day as a refresher for boards and to prepare medical students for their neurosurgical rotations or before getting into the residency

The Neurologic Diagnosis Jack N. Alpert, 2018-11-27 An introductory text that transitions into a moderately advanced case based analysis of neurologic disorders and diseases this book emphasizes how to simplify the process of making a neurologic diagnosis Medical students and residents are often intimidated by a deluge of data perception of anatomic complexity extensive differential diagnoses and often have no organized structure to follow Diagnostic methods of general medicine are not applicable Indeed neurology is a unique specialty since it requires the intermediary step of an anatomic diagnosis prior to proffering a differential diagnosis Yet the required knowledge of neuroanatomy need not be profound for the student or resident who will not specialize in neurology or neurosurgery

The Neurologic Diagnosis A Practical Bedside Approach 2nd Edition is primarily directed to neurology and neurosurgery residents but it will be useful for medical and family practice residents who will discover that a great percentage of their patients have neurologic symptoms A one month neurology rotation out of four years of medical school is not sufficient to make a cogent neurologic diagnosis The aim of this concise practical book which includes an in depth video of how to perform a neurologic examination is to facilitate the process of establishing a neuroanatomic diagnosis followed by a rigorous analysis of symptoms and signs to reach a well thought out differential diagnosis Focused and succinct this book is an invaluable resource for making a lucid neurologic diagnosis
