Neurobehavioral Toxicity Bernard Weiss, 1994-06-30 In establishing how certain chemicals can cause behavioural disorders the process of neurotoxicity risk assessment poses significant challenges to every discipline within neuroscience In this volume leaders from industrial academic and government settings share insights on behavioural measurement in neurotoxicity risk assessment and address the critical scientific issues arising from the expanding role of neurobehavioral toxicology in public policy development The authors set out to provide a comprehensive and authoritative review of current methods in the analysis and interpretation of neurobehavioural toxicology Coverage begins with a discussion of criteria for determining neurotoxic potential The next section examines neurobehavioural evaluations in developmental neurotoxicity Subsequent sections focus on activity and observational data and applications of schedule controlled operant behaviour in toxicity testing The contributors address controversies surrounding the suitability and interpretation of procedures designed for neurotoxicological assessments Some case studies are also included

Aluminium and Alzheimer's Disease C. Exley, 2001-07-03 The subject of aluminium and Alzheimer's disease has been plagued with controversy This controversy has served to obscure much of the scientific research in this field and subsequently has obscured the possibility that aluminium is a contributory factor in the aetiology of Alzheimer's disease This book brings together many of the world's leading scientists researching aluminium and life and contains their critical summaries on the known facts about aluminium toxicity in man and to offer an opinion on the implications of this knowledge on a link between aluminium and Alzheimer's disease The subject areas of the chapters were chosen to reflect the myriad of ways that aluminium is known to impact upon mammalian physiology and function and range from clinical studies through animal models of disease to the detailed biochemistry of aluminium toxicity Chapters are also included on epidemiology and other factors involved in the aetiology of Alzheimer's This is the first time that this subject has been treated in such a comprehensive manner The research detailed in each chapter includes the latest research in the field it has been critically appraised and this appraisal has been used by each author to present an informed opinion of its relevance to aluminium and Alzheimer's disease The chapters are much more than reviews they are a statement of the state of the art and of what the future may hold for research in this field As a whole they show the high quality of research that has been carried out in our efforts to understand the toxicity of aluminium in man and that we

are far away from discounting the possibility that aluminium is a contributory factor in the aetiology of Alzheimer's disease
