CHEMISTRY

Section I

Time—1 hour and 30 minutes

NO CALCULATOR MAY BE USED WITH SECTION I.

Note: For all questions, assume that the temperature is 298 K, the pressure is 1.00 atmosphere, and solutions are aqueous unless otherwise specified.

Throughout the test the following symbols have the definitions specified unless otherwise noted.

T	= temperature	L, mL	= liter(s), milliliter(s)
P	= pressure	g	= gram(s)
V	= volume	nm	= nanometer(s)
S	= entropy	atm	= atmosphere(s)
H	= enthalpy	mm Hg	= millimeters of mercury
G	= Gibbs free energy	J, kJ	= joule(s), kilojoule(s)
R	= molar gas constant	V	= volt(s)
n	= number of moles	mol	= mole(s)
M	= molar		
m	= molal		

Part A

Directions: Each set of lettered choices below refers to the numbered statements immediately following it. Select the one lettered choice that best fits each statement and then fill in the corresponding oval on the answer sheet. A choice may be used once, more than once, or not at all in each set.

Questions 1-3 refer to the following types of elements in the periodic table.

- (A) Noble gases
- (B) Alkali metals
- (C) Halogens
- (D) Transition elements
- (E) Actinides

1. Are the most difficult to oxidize in a given period of the periodic table
2. Are always radioactive
3. Are the most likely to form anions

Developing and Validating Test Items Thomas M. Haladyna, Michael C. Rodriguez, 2013-07-18 Since test items are the building blocks of any test learning how to develop and validate test items has always been critical to the teaching learning process As they grow in importance and use testing programs increasingly supplement the use of selected response multiple choice items with constructed response formats This trend is expected to continue As a result a new item writing book is needed one that provides comprehensive coverage of both types of items and of the validity theory underlying them This book is an outgrowth of the author s previous book *Developing and Validating Multiple Choice Test Items* 3e Haladyna 2004 That book achieved distinction as the leading source of guidance on creating and validating selected response test items Like its predecessor the content of this new book is based

on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs especially when these items are delivered in a computer-based environment. Key features include Comprehensive and Flexible. No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity. Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing currently under revision by AERA, APA, and NCME. Illustrative Examples. The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research. A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors. SAGE Handbook of Research on Classroom Assessment James H. McMillan, 2013. The Sage Handbook of Research on Classroom Assessment provides scholars, professors, graduate students, and other researchers and policy makers in the organizations, agencies, testing companies, and school districts with a comprehensive source of research on all aspects of K-12 classroom assessment. The handbook emphasizes theory, conceptual frameworks, and all varieties of research: quantitative, qualitative, mixed methods, to provide an in-depth understanding of the knowledge base in each area of classroom assessment and how to conduct inquiry in the area. It presents classroom assessment research to convey in depth the state of knowledge and understanding that is represented by the research, with particular emphasis on how classroom assessment practices affect student achievement and teacher behavior. Editor James H. McMillan and five Associate Editors bring the best thinking and analysis from leading classroom assessment researchers on the nature of the research, making significant contributions to this prominent and hotly debated topic in education. *The Publishers Weekly*, 2006. *2024-25 NCERT Class-XI & XII Chemistry Solved Papers* YCT Expert Team, 2024-25. An index to library and information science literature. **Nature-based Solutions for Circular Management of Urban Water** Alexandros Stefanakis, Hasan Volkan Oral, Cristina Calheiros, Pedro Carvalho, 2024-03-12. Despite the strong economic growth of the last decades, our modern global society is facing the existential threat of climate change. It is now realized that the linear economic model is not sustainable in the long run and cannot sustain the life standards. The new circular economy approach that is already under discussion suggests the adjustment of our priorities and the re-orientation of the future infrastructure investments. In this context, we are looking for new innovative and sustainable solutions to increase the resiliency of our societies to protect

and restore the ecosystems and to maintain the necessary economic growth without further undermining the planet's boundaries. The well-being of coming generations will depend on our ability to adapt our economies to this challenge. In particular, transforming today's cities into sustainable cities is one of the main adaptations that will be necessary. A holistic approach looking at cities from a system's perspective is needed to achieve this goal. Nature-based solutions (NbS) serve exactly this ambitious and multi-factorial purpose due to their inherent ability not only to tackle climate change but also to provide a series of ecosystem services and social benefits. In the urban context, NbS can deal with main challenges such as urban heat islands, flooding, treatment of wastewater and runoff, and food provision. At the same time, NbS can provide a series of ecosystem services beneficial for the environment and the society, including clean water production, nutrient recovery, heavy metals retention, and a broad range of plant-based materials. In the new circular economy paradigm, NbS can contribute to strategies for climate change adaptation and create a holistic resource management system for the urban biosphere. Thus, this book aims at providing a single reference that discusses the role and effectiveness of NbS in the urban environment and how these systems can contribute to the circular management of water, nutrients, and resources towards resilient, sustainable, and healthy cities. The scope of the book extends to various fields and disciplines such as the built environment, urban water and wastewater resource recovery, urban farming, smart sensing, research and development, technology, and innovation, society, and governance. Research studies, pilot projects, and case studies are part of the book.

Biochemistry Terry

Brown, 2016-09-22. Biochemistry is a major new textbook designed and created specifically for briefer courses in the subject. Written by Prof Terry Brown of the University of Manchester, author of Genomes and Gene Cloning, the book provides the necessary detail and rigour expected for these courses but without the extraneous material found in the larger textbooks. With an increasing number of students taking a short course in biochemistry, there is a growing need for a book that covers the subject concisely and succinctly. Biochemistry has been designed from the outset for these shorter courses; it is not a cut-down version of one of the larger books that dominate the market. Although it is shorter, there is no compromise in content, style, and coverage. The book is attractively designed in full colour throughout with all the pedagogical features expected in a major textbook. It covers what students should be expected to know and is written in the clear and accurate writing style for which Terry Brown is widely lauded. With its competitive price and resources for adopting lecturers, all of the illustrations and diagrams from the book, and answers to the end-of-chapter questions, Biochemistry will become the textbook of choice for any brief biochemistry course. Confirmed Adoptions: Biochemistry is already the required text at the following institutions: Becker College USA, Bishop Burton College UK, Bournemouth University UK, Charles R Drew University of Medicine and Science USA, Charleston Southern University USA, Colorado State University Pueblo USA, Idaho State University USA, Liverpool John Moores University UK, Montclair State University USA, Newcastle University UK, Rivier University USA, Southeast Missouri State University USA, Staffordshire University UK, Stephen F Austin State University USA, Texas Christian University USA, The
