Postcolonial Global Justice Shuk Ying Chan, 2025-08-19 A new account of global justice that recovers anticolonial thought for resisting a neocolonial age Politicians and activists today turn to the language of decolonization to call attention to such issues as cultural and linguistic decline exploitative foreign investment and global institutions dominated by superpowers But does anticolonial thought really provide a model for reimagining world politics The history of decolonization has not resulted in the liberating transformations that many envisioned In *Postcolonial Global Justice* Shuk Ying Chan proposes a new account of postcolonial global justice centered around the value of social equality Drawing on the thought of Aimé Césaire Frantz Fanon Kwame Nkrumah and Jawaharlal Nehru Chan argues that a central theme in anticolonial thought is the rejection of hierarchy and the embrace of equality These ideas from decolonization she suggests give us tools for critiquing contemporary global hierarchies and for rejecting postcolonial nationalism more concerned with policing its citizens than promoting their freedom and equality Following the wave of postcolonial state founding in the twentieth century many in the West saw decolonization as largely accomplished and yet global politics continue to feature hierarchies that resemble colonial relations Chan investigates these new and persistent colonial hierarchies across three areas of contemporary world politics international investment cultural imperialism and

AI takes hold across the planet and wealthy nations seek to position themselves as global leaders of this new technology the gap is widening between those who benefit from it and those who are subjugated by it As Rachel Adams shows in this hard hitting book growing inequality is the single biggest threat to the transformative potential of AI Not only is AI built on an unequal global system of power it stands poised to entrench existing inequities further consolidating a new age of empire AI

s impact on inequality will not be experienced in poorer countries only it will be felt everywhere The effects will be seen in an intensification of international migration as opportunities increasingly concentrate in the hands of wealthier nations in heightened political instability and populist politics and in climate related disasters caused by an industry that is blind to its environmental impact across supply chains We need to act now to address these issues Only if the current inequitable trajectory of AI is halted the incentives changed and the production and use of AI decentralized and decoupled from wealthier nations will AI be able to deliver on its promise to build a better world for all Also available as an audiobook
