Spectrometric Identification of Organic Compounds Robert Milton Silverstein, Francis X. Webster, 1998 This book is characterized by its problem solving approach with extensive reference charts and tables First published in 1962 this was the first book on the identification of organic compounds using spectroscopy Now considered a classic it can be found on the shelf of every Organic Chemist The key strength of this text is the extensive set of real data problems in Chapters 8 and 9 Even professional chemists use these spectra as reference data Spectrometric Identification of Organic Compounds is written by and for organic chemists and emphasizes the synergistic effect resulting from the interplay of the spectra

Spectrometric Identification of Organic Compounds Robert M. Silverstein, G. Clayton Bassler, Terence C. Morrill, 1991-03-06 Teaches the use of the complementary information afforded by four types of spectrometry for identification of organic compounds mass infrared nuclear magnetic resonance and ultra violet spectrometry Throughout the emphasis is on the relationship between chemical structure and spectral response of the molecule Each chapter includes problems to facilitate student comprehension and demonstrate practical aspects of the material Also provided are extensive reference material in charts and tables at the end of each chapter solved problems and 50 sets of Spectra of Compounds to be identified In addition to extensive updating the Fifth Edition includes a new chapter on New Dimensions in NMR
