15 Smart Fortwo Tech Manual:

The Engineering Handbook of Smart Technology for Aging, Disability, and Independence Abdelsalam

Helal, Mounir Mokhtari, Bessam Abdulrazak, 2008-08-20 An advanced look at smart technology to promote the independence of the elderly and disabled. Ongoing research and advancements in technology are essential for the continuing independence of elderly and disabled persons. The Engineering Handbook of Smart Technology for Aging Disability and Independence provides a thorough analysis of these technologies and the needs of the elderly and disabled including a breakdown of demographics, government spending, growth rate, and much more. Each chapter is written by an expert in his or her respective field and gives readers unparalleled insight into the research and developments in a multitude of important areas including: User need analyses, classifications, and policies; Assistive devices and systems for people with motor disabilities; Assistive devices and systems for people with visual and hearing impairments; Human machine interaction and virtual reality; Assistive robotics; Technology for user mobility and object manipulation; Smart homes as assistant environments; A discussion of emerging standards and guidelines to build accessible devices, tools, and environments. This book is an indispensable resource for researchers and professionals in computer science, rehabilitation science, and clinical engineering. It also serves as a valuable textbook for graduate students in the aforementioned fields.

Handbook Factory Planning and Design

Hans-Peter Wiendahl, Jürgen Reichardt, Peter Nyhuis, 2015-04-20 This handbook introduces a methodical approach and pragmatic concept for the planning and design of changeable factories that act in strategic alliances to supply the ever-changing needs of the global market. In the first part, the change drivers of manufacturing enterprises and the resulting new challenges are considered in detail with focus on an appropriate change potential. The second part concerns the design of the production facilities and systems on the factory levels: work place, section building, and site under functional, organisational, architectural, and strategic aspects, keeping in mind the environmental, health, and safety aspects including corporate social responsibility. The third part is dedicated to the planning and design method that is based on a synergetic interaction of process and space. The accompanying project management of the planning and construction phase and the facility management for the effective utilization of the built premises close the book. The Authors: Prof. em. Dr.-Ing. Dr. mult. h. c. Hans-Peter Wiendahl has been director for 23 years of the Institute of Factory planning and Logistics at the Leibniz University of Hannover in Germany. Prof. Dipl.-Ing. Architekt BDA Jürgen Reichardt is Professor at the Münster school of architecture and partner of RMA Reichardt Maas Associate Architects in Essen, Germany. Prof. Dr.-Ing. habil. Peter Nyhuis is Managing Director of the Institute of Factory Planning and Logistics at the Leibniz University of Hannover in Germany.
