LIFE ORIENTATION MARKING GUIDE

INSTRUCTIONS TO MARKERS

1. Please mark according to the provincial examination guideline.
2. Consider all realistic / relevant answers.
3. Do not expand the memorandum with your own answers as this is a common provincial task and should assist in fair and valid assessment across the province.
4. Adhere to the memorandum throughout the marking process as the questions are content specific and answers should reflect the content taught and assessed.
5. Mark accurately and always check all calculations and transfer of marks.
6. At least 10% of all answer scripts should be remarked by the HOD / senior teacher as part of the post-moderation process.
7. Remember we are working with learners' futures, so let us be fair, valid and just in assessing their work.

This marking guide consists of 7 pages.

The Medical Library Association Guide to Data Management for Librarians Lisa Federer, 2016-09-15 Technological advances and the rise of collaborative interdisciplinary approaches have changed the practice of research. The 21st century researcher not only faces the challenge of managing increasingly complex datasets but also new data sharing requirements from funders and journals. Success in today's research enterprise requires an understanding of how to work effectively with data yet most researchers have never had any formal training in data management. Libraries have begun developing services and programs to help researchers meet the demands of the data driven research enterprise giving librarians exciting new opportunities to use their expertise and skills. The Medical Library Association Guide to Data Management for Librarians highlights the many ways that librarians are addressing researchers changing needs at a variety of institutions including academic hospital and government libraries. Each chapter ends with pearls of wisdom a bulleted list of 5-10 takeaway messages from the chapter that will help readers quickly put the ideas from the chapter into practice. From theoretical foundations to practical applications this book provides a background for librarians who are new to data management as well as new ideas and approaches for experienced data librarians.

Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, Paige Cullen Pullen, 2017-05-25 The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education. To ensure consistency across the volume chapter authors review and integrate existing research identify strengths and weaknesses note gaps in the literature and discuss implications for practice and future research. The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research and an entirely new section has been added on research methods in special education.

The Oxford Handbook of Work and Family Tammy D. Allen, Lillian Turner de Tormes Eby, 2016 The Oxford Handbook of Work and Family features 35 chapters from leading scholars that focus on the worker family organization community and how these issues intersect. It includes razor sharp reviews of long standing topics of interest fresh ideas to propel work family research in new directions and evidence based practical recommendations to improve organizational practices.

[Why is it so challenging to cultivate open government data?](#) Jonathan Crusoe, 2019-04-02 Introduction This compilation licentiate thesis focuses on open government data (OGD). The thesis is based on three papers. OGD is a system that is organized when publishers collect and share data with users who can unrestrictedly reuse the data. In my research I have explored why it can be challenging to cultivate OGD. Cultivation is human activities that change encourage or guide human organizations towards a higher purpose by changing introducing managing or removing conditions. Here the higher purpose is OGD to realize believed benefits. Thus OGD cultivation is an attempt to stimulate actors into organizing as OGD. Problem and Purpose OGD is believed to lead to several benefits. However the worldwide OGD movement has slowed down and researchers have noted a lack of use. Publishers and users are experiencing

a set of different impediments that are challenging to solve In previous research there is a need for more knowledge about what can impede the OGD organization cause non valuable organizing or even collapse the organization At the same time there is a lack of knowledge about how impediments shape the organization of OGD This gap can make it hard to solve and overcome the impediments experienced by publishers and users The sought after knowledge can bring some understanding of the current situation of OGD In this research I have viewed the organization of OGD as an ecosystem The purpose of this thesis is to draw lessons about why it can be challenging to cultivate OGD ecosystems by understanding OGD impediments from an ecosystem perspective Research Design I set out to explore OGD through qualitative research from 2016 to 2018 My research started with a pilot case study that led to three studies The studies are each reported in a paper and the papers form the base of this thesis The first paper aims to stimulate the conceptually oriented discussion about actors roles in OGD by developing a framework that was tested on a Swedish public agency The second paper has the purpose of expanding the scope surrounding impediments and was based in a review and systematization of previous research about OGD impediments The third paper presents an exploration of impediments experienced by publishers users and cultivators in the Swedish national OGD ecosystem to identify faults From the three papers lessons were drawn in turn and together that are presented in this thesis Findings Cultivators when cultivating OGD ecosystems are facing towering challenges The following three main challenges are identified in this thesis 1 to cultivate a system that can manage stability by itself without constant involvement 2 to cultivate a system that is capable of evolving towards a greater good by itself and 3 to have an up to date precise vocabulary for a self evolving system that enables inter subjective understand for coordinating problem solving Contribution The theoretical contribution of this thesis is that OGD ecosystems can be viewed as a public utility Moreover I recommend that researchers approach the organizing of OGD as the cultivation of evolution rather than the construction of a structure to consider the stability of the system in growth value and participation and to be cautious with how they label and describe OGD actors For actors that are cultivating OGD I recommend that they guide the OGD actors to help them organize view OGD cultivation as the management of evolution growth towards a purpose and view cultivation as a collaborative effort where they can supply ideas technologies practices and expertise **The Oxford Handbook of Spontaneous Thought**

Kieran C. R. Fox, Kalina Christoff, 2018 Where do spontaneous thoughts come from It may be surprising that the seemingly straightforward answers from the mind or from the brain are in fact an incredibly recent understanding of the origins of spontaneous thought For nearly all of human history our thoughts especially the most sudden insightful and important were almost universally ascribed to divine or other external sources Only in the past few centuries have we truly taken responsibility for their own mental content and finally localized thought to the central nervous system laying the foundations for a protoscience of spontaneous thought But enormous questions still loom what exactly is spontaneous thought Why does our brain engage in spontaneous forms of thinking and when is this most likely to occur And perhaps the question most

interesting and accessible from a scientific perspective how does the brain generate and evaluate its own spontaneous creations Spontaneous thought includes our daytime fantasies and mind wandering the flashes of insight and inspiration familiar to the artist scientist and inventor and the nighttime visions we call dreams This Handbook brings together views from neuroscience psychology philosophy phenomenology history education contemplative traditions and clinical practice to begin to address the ubiquitous but poorly understood mental phenomena that we collectively call spontaneous thought In studying such an abstruse and seemingly impractical subject we should remember that our capacity for spontaneity originality and creativity defines us as a species and as individuals Spontaneous forms of thought enable us to transcend not only the here and now of perceptual experience but also the bonds of our deliberately controlled and goal directed cognition they allow the space for us to be other than who we are and for our minds to think beyond the limitations of our current viewpoints and beliefs
