,1994 **Search for $t\bar{t}H$ Production in the $H \rightarrow b\bar{b}$ Decay Channel** Marcel Rieger,2021-02-25 In 1964 a mechanism explaining the origin of particle masses was proposed by Robert Brout Francois Englert and Peter W Higgs 48 years later in 2012 the so called Higgs boson was discovered in proton proton collisions recorded by experiments at the LHC Since then its ability to interact with quarks remained experimentally unconfirmed This book presents a search for Higgs bosons produced in association with top quarks $t\bar{t}H$ in data recorded with the CMS detector in 2016 It focuses on Higgs boson decays into bottom quarks $H \rightarrow b\bar{b}$ and top quark pair decays involving at least one lepton In this analysis a multiclass classification approach using deep learning techniques was applied for the first time In light of the dominant background contribution from $t\bar{t}$ production the developed method proved to achieve superior sensitivity with respect to existing techniques In combination with searches in different decay channels the presented work contributed to the first observations of $t\bar{t}H$ production and $H \rightarrow b\bar{b}$ decays

Radiopharmaceutical Chemistry Jason S. Lewis,Albert D. Windhorst,Brian M. Zeglis,2019-04-02 This book is a comprehensive guide to radiopharmaceutical chemistry The stunning clinical successes of nuclear imaging and targeted radiotherapy have resulted in rapid growth in the field of radiopharmaceutical chemistry an essential component of nuclear medicine and radiology However at this point interest in the field outpaces the academic and educational infrastructure needed to train radiopharmaceutical chemists For example the vast majority of texts that address radiopharmaceutical chemistry do so only peripherally focusing instead on nuclear chemistry i e nuclear reactions in reactors heavy element radiochemistry i e the decomposition of radioactive waste or solely on the clinical applications of radiopharmaceuticals e g the use of PET tracers in oncology This text fills that gap by focusing on the chemistry of radiopharmaceuticals with key coverage of how that knowledge translates to the development of diagnostic and therapeutic radiopharmaceuticals for the clinic The text is divided into three overarching sections First Principles Radiochemistry and Special Topics The first is a general overview covering fundamental and broad issues like The Production of Radionuclides and Basics of Radiochemistry The second section is the main focus of the book In this section each chapter's author will delve much deeper into the subject matter covering both well established and state of the art techniques in radiopharmaceutical chemistry This section will be divided according to radionuclide and will include chapters on radiolabeling methods using all of the common nuclides employed in radiopharmaceuticals including four chapters on the ubiquitously used fluorine 18 and a Best of the Rest chapter

to cover emerging radionuclides Finally the third section of the book is dedicated to special topics with important information for radiochemists including Bioconjugation Methods Click Chemistry in Radiochemistry and Radiochemical Instrumentation This is an ideal educational guide for nuclear medicine physicians radiologists and radiopharmaceutical chemists as well as residents and trainees in all of these areas Challenges for Radiation Transport Modelling: Monte Carlo and Beyond Miguel Antonio Cortés-Giraldo, Francis A. Cucinotta, Susanna Guatelli, Vasilis Vlachoudis, 2022-08-19 *Energy Research Abstracts*, 1983 **Psychiatric and Mental Health Nursing in the UK** Katie Evans, Debra Nizette, Anthony O'Brien, Catherine Johnson, 2019-06-28 Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses Thoroughly revised and updated to reflect current research and the UK guidelines as well as the changing attitudes about mental health mental health services and mental health nursing in UK Set within a recovery and patient framework this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice along with helpful suggestions about what the mental health nurse can say and do to interact effectively with patients and their families Gives readers a thorough grounding in the theory of mental health nursing Case studies throughout the text allow readers to understand the application of theory in every day practice Includes critical thinking challenges and ethical dilemmas to encourage the reader to think about and explore complex issues Exercises for class engagement complement learning and development in the classroom environment
