Everyday Lifestyles and Sustainability Fabricio Chicca, Brenda Vale, Robert Vale, 2018-04-09 The impact of humanity on the earth overshoots the earth's bio capacity to supply humanity's needs meaning that people are living off earth's capital rather than its income However not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints This leads to comparison and discussion of what living within the limits of the planet might mean Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives This book takes a bottom up approach by calculating the footprints of daily living The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future Offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies

Porsche Turbo Randy Leffingwell, 2015-10-23 Celebrate the rebirth of the world's most stunning high performance automobile Porsche made history when it brought turbocharging to the racing world in the form of the 917 When strict regulations regarding engine displacement took away the option of bigger engines manufacturers turned to forced induction In its wildest trim the original 12 cylinder turbocharged Porsche racing engine yielded as much as 1,400 horsepower Porsche's official philosophy was that racing cars must have a connection to street cars so it was preordained that Porsche would eventually produce a turbocharged version of its air cooled flat six cylinder engine The resulting 930 Turbo appeared in the spring of 1975 in Europe Acceleration from 0 to 100 kilometers per hour took a scant 5.5 seconds and its top speed was 155 miles per hour The Turbo's distinctive rear wing let the world know that this was something very special It was nothing less than the rebirth of the high performance automobile At a time when the big block engines in America's so called muscle cars were putting out 180 horsepower and the engines in exotic supercars weren't much more ambitious the lightweight Porsche was a genuine rocket Porsche Turbo The Inside Story of Stuttgart's Turbocharged Road and Race Cars celebrates Porsche's five decades of turbocharged supercar performance both on the track and on the street It covers all of the major racing cars as well as the turbocharged street cars including the 930 935 924 944 968 911 and Cayenne Panamera Don't let this one fly past you
