OECD Skills Outlook 2015 Youth, Skills and Employability OECD,2015-05-27 Young people around the world are struggling to enter the labour market In some OECD countries one in four 16 29 year olds is neither employed nor in education or training The OECD Skills Outlook 2015 shows how improving the employability of youth requires a comprehensive approach While

Food Insecurity in India's Agricultural Heartland Harpreet Kaur Narang,2022-07-14 India is home to the world s largest hungry population and has a long way to go before it is anywhere near the mammoth task of achieving the United Nations goal of ending hunger in 2030 It is ironic that this book raises the issue of Hunger in a state where it is least expected Punjab is a state with mountains of food grains and overflowing godowns with highest yields and largest area under irrigation Not only that it is the Green Revolution state of India that has played the most prominent role in helping India achieve its goal of food self sufficiency By investigating the hydra headed concept of food security in Indian Punjab this book brings to fore the different dimensions of the deprivation of human capabilities and the intricate relationship between food security and economy ecology and state policy Moreover it is a wakeup call for India for if this is the state of affairs in one of the more prosperous primarily agrarian states what would be the situation in the poorer ones The primary objective is to divert urgent attention to the issue of food security as an important ingredient of human resource development With a strong commitment to achieving the primary goal of human resource development India s biggest burden could well become India s greatest asset in the path to inclusive development

Today's Nutrition and Tomorrow's Public Health: Challenges and Opportunities Irene Lenoir-Wijnkoop,Iñaki Gutiérrez-Ibarluzea,Dominique J. Dubois,2016-04-29 At the dawn of the third millennium we are confronted with a disturbing phenomenon although global life expectancy still increases this is not the case for healthy life expectancy The explanation of this seemingly contradiction is mainly due to the rising prevalence of the new pandemic of chronic non communicable diseases NCDs Even in low and middle income countries the improvement in healthcare status and life expectancy is paralled by the increase of NCDs as in all countries worldwide Since the United Nations General Assembly held in New York in 2011 many publications have emphasized the close link between NCDs and nutrition The NCDs epidemic forces us to reconsider the public health perspectives Many governments non governmental organizations and other institutions are actively involved in educational nutrition programs and campaigns however their efforts seldom obtain the results hoped for It is extremely difficult to induce changes in lifestyle and behavior that have built up over a long period of time However it becomes urgent to adapt to our changing life environment where traditional wisdom and intuitive choices are giving way to

individual thinking and search for often uncontrolled information This engenders a number of unprecedented challenges and it calls for a re appraisal of the existing paradigms to achieve an adequate management of the upstream determinants of health instead of a pre dominant medical and hospital centric approach In the era of personalized healthcare it is time to empower policy makers professionals and citizens for achieving an evidence based change in the health disease interface and decision making process for public health interventions The scientific and professional society Health Technology Assessment International HTAi has recognized nutrition as a health technology preventative by creating a Interest Group IG dedicated to research on methodologies and assessments of nutrition related public health while taking into account contextual factors ethical legal social organizational economic in order to generate meaningful outcomes for establishing evidence based health policies This Research Topic aims to elaborate on some of the potential hurdles or guarantees which have to be overcome for the sake of sustainable healthcare provisions anywhere in the world such as shortcomings in methodological approaches regulatory frameworks gaps between evidence its hierarchy and final recommendations for public health management
