Iterations with Errors P. Frank, 1960 Parameter Estimation in Fractional Diffusion Models Kęstutis Kubilius, Yuliya Mishura, Kostiantyn Ralchenko, 2018-01-04 This book is devoted to parameter estimation in diffusion models involving fractional Brownian motion and related processes For many years now standard Brownian motion has been and still remains a popular model of randomness used to investigate processes in the natural sciences financial markets and the economy The substantial limitation in the use of stochastic diffusion models with Brownian motion is due to the fact that the motion has independent increments and therefore the random noise it generates is white i e uncorrelated However many processes in the natural sciences computer networks and financial markets have long term or short term dependences i e the correlations of random noise in these processes are non zero and slowly or rapidly decrease with time In particular models of financial markets demonstrate various kinds of memory and usually this memory is modeled by fractional Brownian diffusion Therefore the book constructs diffusion models with memory and provides simple and suitable parameter estimation methods

in these models making it a valuable resource for all researchers in this field The book is addressed to specialists and researchers in the theory and statistics of stochastic processes practitioners who apply statistical methods of parameter estimation graduate and post graduate students who study mathematical modeling and statistics A new French and English Lexicon ... preceded by a compendious Key, that shows how to find out the meaning of any part of speech, etc. Nouveau Lexique Français Anglais, etc Marin J.
