Causes, Impacts and Solutions to Global Warming Ibrahim Dincer, Can Ozgur Colpan, Fethi Kadioglu, 2013-10-29 Global Warming Causes Impacts and Solutions covers all aspects of global warming including its causes impacts and engineering solutions Energy and environment policies and strategies are scientifically discussed to expose the best ways to reduce global warming effects and protect the environment and energy sources affected by human activities The importance

of green energy consumption on the reduction of global warming energy saving and energy security are also discussed This book also focuses on energy management and conservation strategies for better utilization of energy sources and technologies in buildings and industry as well as ways of improving energy efficiency at the end use and introduces basic methods for designing and sizing cost effective systems and determining whether it is economically efficient to invest in specific energy efficiency or renewable energy projects and describes energy audit producers commonly used to improve the energy efficiency of residential and commercial buildings as well as industrial facilities These features and more provide the tools necessary to reduce global warming and to improve energy management leading to higher energy efficiencies In order to reduce the negative effects of global warming due to excessive use of fossil fuel technologies the following alternative technologies are introduced from the engineering perspective fuel cells solar power generation technologies energy recovery technologies hydrogen energy technologies wind energy technologies geothermal energy technologies and biomass energy technologies These technologies are presented in detail and modeling studies including case studies can also be found in this book

Representation Theorems in Computer Science Özgür Lütfü Özçep,2019-07-16 Formal specifications are an important tool for the construction verification and analysis of systems since without it is hardly possible to explain whether a system worked correctly or showed an expected behavior This book proposes the use of representation theorems as a means to develop an understanding of all models of a specification in order to exclude possible unintended models demonstrating the general methodology with representation theorems for applications in qualitative spatial reasoning data stream processing and belief revision For qualitative spatial reasoning it develops a model of spatial relatedness that captures the scaling context with hierarchical partitions of a spatial domain and axiomatically characterizes the resulting relations It also shows that various important properties of stream processing such as prefix determinedness or various factorization properties can be axiomatized and that the axioms are fulfilled by natural classes of stream functions The third example is belief revision which is concerned with the revision of knowledge bases under new potentially incompatible information In this context the book considers a subclass of revision operators namely the class of reinterpretation operators and characterizes them axiomatically A characteristic property of reinterpretation operators is that of dissolving potential inconsistencies by reinterpreting symbols of the knowledge base Intended for researchers in theoretical computer science or one of the above application domains the book presents results that demonstrate the use of representation theorems for the design and evaluation of formal specifications and provide the basis for future application development kits that support application designers with automatically built representations

Energy Systems and Management Ali Nezihi

Bilge,Ayhan Özgür Toy,Mehmet Erdem Günay,2015-03-25 Readers of this work will find examinations of the current status and future status for energy sources and technologies their environmental interactions and the relevant global energy policies The work begins with an overview of Energy Technologies for a Sustainable Future which examines the correlation

between population economy and energy consumption in the past and reviews the conventional and renewable energy sources as well as the management of them to sustain the ever growing energy demand in the future The rest of the chapters are divided into 3 parts the first part of the book Energy Sources Technologies and Environment consists of 12 chapters which include research on new energy technologies and evaluation of their environmental effects The second part Advanced Energy Materials includes 7 chapters devoted to research on material science for new energy technologies The final section titled Energy Management Economics and Policy is comprised of 10 chapters about planning controlling and monitoring energy related processes together with the policies to satisfy the needs of increasing population and growing economy The chapters are selected works from the International Conference on Energy and Management which was organized by Istanbul Bilgi University Department of Energy Systems Engineering and PALMET Energy to share the knowledge on the recent trends scientific developments innovations and management methods in energy and held on 5 7th June 2014 at Istanbul Bilgi University Yönetmelik Kavramlara Güncel Bakış Aynur Acer,Ayşe Atılğan Sarıdoğan,Ayşegül Ertuğrul Ayrancı,Canan Tiftik,Derya Yücel,Dilek Eren,Ezgi Berte Kutlu,Fatih Yaman,Hacer Handan Demir,Haydar Baki Doğan,Hikmet İskender,Hülya Er,Lina Karabetyan,Özgür Çark,Rahmi Yücel,Sezer Ayaz,Tolga Türköz,Yahya Can Dura, *Sustainable Current Approaches in Architectural Science and Technology* A. Cryopreservation in Assisted Reproduction Zsolt Peter Nagy,Alex C. Varghese,Ashok Agarwal,2024-07-15 Cryopreservation of oocytes sperm and ovarian and testicular tissues as well as embryos is one of the most critical procedures to preserve the reproductive capacity of individuals It is an indispensable part of assisted reproductive technologies as nearly all IVF clinics around the world have embraced the freeze all embryo strategy with no fresh embryo transfers Advanced platforms such as automation and artificial intelligence are making their way into all aspects of assisted reproductive technologies including reproductive tissue banking process and storage At the same time lax regulations and lack of training combined with rapid demands of IVF services have resulted in a climate of frequent disaster and catastrophic incidents from the cryo labs that store thousands of patients embryos for years With the onset of malpractice lawsuits against the clinics and awards of large compensation to the patients regulations are getting stricter in this arena to safeguard the integrity of storage systems and industry leaders are developing advanced devices and alarm systems to remotely monitor storage systems exploring the power of internet AI and automation Therefore there is an urgent need for a comprehensive text in this field based on the introduction of such a wide array of advanced devices newer technologies regulatory frameworks risks and disaster management options With contributions from top internationally recognized scientists and clinicians with expertise in cryopreservation and reproductive technology this book provides a comprehensive overview of

the basics of cryobiological processes and a technically detailed presentation on all aspects of cryopreservation of reproductive cells and tissues It presents the current well established procedures as well as novel techniques with the latest innovations described in detail Bringing together the latest information with key thought leaders in the field Cryopreservation in Assisted Reproduction is intended to be the go to resource for all reproductive medicine clinicians embryologists lab technologists IVF lab directors managers and researchers
