Historics Martin L. Davies, 2007-05-07 From an author at the forefront of research in this area comes this provocative and seminal work that presents a unique and fresh new look at history and theory Taking a broadly European view the book draws on works of French and German philosophy some of which are unknown to the English speaking world and Martin L Davies spells out what it is like to live in a historicized world where any event is presented as historical as or even before it happens Challenging basic assumptions made by historians Davies focuses on historical ideas and thought about the past instead of examining history as a discipline The value of history in and for contemporary culture is explained not only in terms of cultural and institutional practices but in forms of writing and representation of historical issues too Historics stimulates thinking about the behaviours and practice that constitute history and introduces complex ideas in a clear and approachable style This important text is recommended not only for a wide student audience but for the more discerning general reader as well

The Nation and Its Fragments Partha Chatterjee, 2020-05-05 In this book the prominent theorist Partha Chatterjee looks at the creative and powerful results of the nationalist imagination in Asia and Africa that are posited not on identity but

on difference with the nationalism propagated by the West Arguing that scholars have been mistaken in equating political nationalism with nationalism as such he shows how anticolonialist nationalists produced their own domain of sovereignty within colonial society well before beginning their political battle with the imperial power These nationalists divided their culture into material and spiritual domains and staked an early claim to the spiritual sphere represented by religion caste women and the family and peasants Chatterjee shows how middle class elites first imagined the nation into being in this spiritual dimension and then readied it for political contest all the while normalizing the aspirations of the various marginal groups that typify the spiritual sphere While Chatterjee s specific examples are drawn from Indian sources with a copious use of Bengali language materials the book is a contribution to the general theoretical discussion on nationalism and the modern state Examining the paradoxes involved with creating first a uniquely non Western nation in the spiritual sphere and then a universalist nation state in the material sphere the author finds that the search for a postcolonial modernity is necessarily linked with past struggles against modernity
