East Asian Regionalism Christopher M. Dent, 2008-02-19 East Asia is a region that holds much fascination for many people. It is one of the world's most dynamic and diverse regions and is also becoming an increasingly coherent region through the interplay of various integrative economic, political, and socio-cultural processes. Such a development is generally referred to as regionalism, which itself has become a defining feature of the contemporary international system, and this book explores the various ways in which East Asian regionalism continues to deepen. Focusing on the main themes of the East Asia region and the study of regionalism, economic regionalism, and East Asia's new economic geography, Southeast Asia, and the Association of Southeast Asian Nations (ASEAN), trans-regionalism, East Asia's new free trade agreement trends, and key transnational issues in East Asia such as international migration and energy security, *East Asian Regionalism* will be an essential text for courses on East Asian regionalism, Asian politics, and Asian economics. Key pedagogical features include end-of-chapter study questions, case studies that discuss topical issues with study questions also provided, useful tables and figures which illustrate key regional trends in East Asia, extensive summary conclusions covering the chapter's main findings from different international political economy perspectives.

The Canadian Car Buyer's Survival Guide John Terauds, 1996-08-01 *Kiplinger's Personal Finance*, 1974-04 The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership, and many other personal finance topics **States Against Markets** Robert Boyer, Daniel Drache, 2005-08-15 This work challenges the popular view that globalization threatens the role of the nation-state in determining national policy. It examines the fundamental issue of competitiveness and market power in an increasingly borderless and co-dependent world. Despite this increased threat to the nation-state as an effective manager of the national economy, the authors argue that there are a number of options and alternatives open to governments to protect themselves from the global business cycle.

Rohwer, Volker Bittrich, 2013-06-29 This volume the first of this series dealing with angiosperms comprises the treatments of 73 families representing three major blocks of the dicotyledons magnoliids centrosperms and hamamelids These blocks are generally recognized as subclasses in modern textbooks and works of

reference We consider them a convenient means for structuring the hundreds of dicotyledon families but are far from taking them at face value for biological let alone monophyletic entities Angiosperm taxa above the rank of family are little consolidated as is easily seen when comparing various modern classifications Genera and families in contrast are comparatively stable units and they are important in practical terms The genus is the taxon most frequently recognized as a distinct entity even by the layman and generic names provide the key to all information available about plants The family is as a rule homogeneous enough to conveniently summarize biological information yet comprehensive enough to avoid excessive redundancy The emphasis in this series is therefore primarily on families and genera
