Algorithms Lab Manual:

A Laboratory Course in C++ Nell Dale, 2009-06-23 Through hands on lab exercises this lab manual teaches the syntax and semantics of C constructs in a flexible framework that is perfect for both closed lab settings and independent learning. The exercises are broken into three types of activities: Pre Lab Reading review and paper and pencil exercises designed to ensure understanding of the material to be covered in the exercises; In Lab Individual lessons broken into exercises specifically mapped to the concepts covered in the chapter; Post Lab Programming assignments which can be done independently and cover the important topics from the chapter. Checklist cover sheets allow students and instructors to track the assignments output and grading for each exercise. Perforated pages aid in submission and grading of exercises and homework assignments.
