This volume constitutes the proceedings of the Sixth International Conference on Flexible Query Answering Systems FQAS 2004 held in Lyon France on June 24-26 2004. FQAS is the premier conference for researchers and practitioners concerned with the vital task of providing easy, flexible and intuitive access to information for every type of need. This multidisciplinary conference draws on several research areas including databases, information retrieval, knowledge representation, soft computing, multimedia and human computer interaction. With FQAS 2004, the FQAS conference series celebrated its tenth anniversary as it has been held every two years since 1994. The overall theme of the FQAS conferences is innovative query systems aimed at providing easy, flexible and intuitive access to information. Such systems are intended to facilitate retrieval from information repositories such as databases, libraries and the Web. These repositories are typically equipped with standard query systems that are often inadequate for users. The focus of FQAS is the development of query systems that are more expressive, informative, cooperative, productive and intuitive to use.
