Sea Ice David N. Thomas, 2017-03-06 Over the past 20 years the study of the frozen Arctic and Southern Oceans and sub arctic seas has progressed at a remarkable pace This third edition of Sea Ice gives insight into the very latest understanding of the how sea ice is formed how we measure and model its extent the biology that lives within and associated with sea ice and the effect of climate change on its distribution How sea ice influences the oceanography of underlying waters and the influences that sea ice has on humans living in Arctic regions are also discussed Featuring twelve new chapters this edition follows two previous editions 2001 and 2010 and the need for this latest update exhibits just how rapidly the science of sea ice is developing The 27 chapters are written by a team of more than 50 of the worlds leading experts in their fields These combine to make the book the most comprehensive introduction to the physics chemistry biology and geology of sea ice that there is This third edition of Sea Ice will be a key resource for all policy makers researchers and students who work with the frozen oceans and seas

Marine Ecosystem Assessment for the Southern Ocean: Meeting the Challenge for Conserving Earth Ecosystems in the Long Term Monica M. C. Muelbert, 2024-12-24

National and international agencies need assessments of change in ecosystems and their drivers in order to sustain natural

systems to maintain the delivery of services and to meet the challenge for conserving Earth ecosystems in the long term In marine systems change may arise directly from human activities e g fisheries indirectly from local or global activities cascading effects through food webs from fisheries or changing environments from climate change and or ocean acidification or from naturally varying processes A particular challenge for managers is to identify how dangerous future climate change will be for ecosystems and their services and whether mitigation or adaptation may be needed in advance in order to achieve the conservation requirements For regions of international attention particularly those that have the attention of many management or policy oriented bodies a standardized process is needed to harmonize the scientific information on the status and trends in ecosystems used by the different bodies That process also needs to ensure the information is available in a timely manner For example assessments of change in habitats species and or food webs in the Southern Ocean are currently compiled separately for at least ten different international organizations or processes A Marine Ecosystem Assessment for the Southern Ocean MEASO aims to harmonize that information for policy makers This assessment began with an international conference in April 2018 <http://www.measo2018.aq> where it was agreed to undertake the first MEASO over 2018-2019 with the view to provide the outcomes to relevant bodies such as the Scientific Committee for the Conservation of Antarctic Marine Living Resources soon after

Ecology of Marine Zooplankton and Micronekton in Polar and Sub-Polar Areas Letterio Guglielmo, Alessandro Bergamasco, Guang Yang, Antonia Granata, 2024-11-01 The Polar and Subpolar region comprise one of the seven regions in the world from the Arctic to the Antarctic the Atlantic Pacific and Indian Oceans Marine biodiversity in the polar and subpolar regions is one of the richest on earth hosting important populations of crustaceans pelagic and benthic species that provide resources for the many seabirds and marine mammals that congregate there However these ecosystems as well as their biodiversity are vulnerable and already affected by the impacts of climate change and other threats The high climatic dynamics in those areas have already generated strong modifications to the environment with irreversible losses in biodiversity and diminished ecosystem services that are essential for the whole planet The current need to study and understand the biodiversity of the world's oceans makes polar and sub polar areas key regions for taxonomic and ecological studies

Scientific and Technical Aerospace Reports, 1984 **Singularly Perturbed Methods for Nonlinear Elliptic Problems** Daomin Cao, Shuangjie Peng, Shusen Yan, 2021-02-18 This introduction to the singularly perturbed methods in the nonlinear elliptic partial differential equations emphasises the existence and local uniqueness of solutions exhibiting concentration property The authors avoid using sophisticated estimates and explain the main techniques by thoroughly investigating two relatively simple but typical non compact elliptic problems Each chapter then progresses to other related problems to help the reader learn more about the general theories developed from singularly perturbed methods Designed for PhD students and junior mathematicians intending to do their research in the area of elliptic differential equations the

text covers three main topics The first is the compactness of the minimization sequences or the Palais Smale sequences or a sequence of approximate solutions the second is the construction of peak or bubbling solutions by using the Lyapunov Schmidt reduction method and the third is the local uniqueness of these solutions
