Correlated Interplanetary and Magnetospheric Observations D.E. Page,2012-12-06 The 1969 ESLAB symposium Interrelated Satellite Observations Related to Solar Events was held at a time when the importance of bringing together measurements made simultaneously in different regions of space was beginning to be appreciated To day it is universally accepted that the major experimental steps forward in understanding the physics of the Sun Earth relationships are likely to be made through pre planned correlated satellite studies Such considerations have led to the organisation of the International Magnetospheric Study and the joint ESRO NASA International Magnetospheric Explorer Mother Daughter Heliocentric mission The seventh ESLAB symposium was planned as a follow up to that of 1969 with the aim of deriving maximum benefit from those spacecraft which through good fortune found themselves simultaneously operating in different regions of the magnetosphere and interplanetary space ESRO had launched in early 1972 its HEOS 2 satellite to investigate fields and particles in the unexplored region far above the North pole of the Earth and it became clear that the interesting new results arriving from that mission could profitably be linked with those from various American and the U S S R PROGNOZ satellites The book follows the order of the symposium unfortunately the PROGNOZ contribution did not materialise concentrating through both review lectures and of new experimental results on the nature of the boundaries between the presentation the interplanetary medium and the magnetosphere and the interaction of each region on the other

New Methodological Perspectives on Observation and Experimentation in Science Wenceslao J. González,2010-12-29 Observation and experimentation are central topics of philosophy and methodology of science The empirical sciences have commonly been associated to observational and experimental processes because they have been considered crucial for testing the contents of these Thus observation and experimentation have received attention from different angles and they have been historically relevant in the advancement of science Their philosophical methodological analysis includes some key aspects those related to axiological epistemological and methodological issues New Methodological Perspectives on Observation and Experimentation in Science deals with a classic topic that is seen from new angles Its nine chapters seek non traditional aspects trying to extend the boundaries of this philosophical methodological theme They are presented in five sections 1 A Philosophical Methodological Context 2 Experience and Scientific Observations 3 Empirical Support and Experiments in Science 4 Changes in the Framework on Observation and Experimentation and 5 Enlarging the Philosophical Scope Law and Ecology Wenceslao J Gonzalez is Professor of Logic and Philosophy of Science University of A Coru a He is a Full Member of the International Academy for Philosophy of Sciences AIPS Visiting fellow at
