Educators clamor to provide top notch lessons and resources for students but if students lack executive function even the best materials won't produce the desired results. If students haven't developed the brain based skills to focus, catch and correct errors, identify cause and effect relationships and more, they can't make sense of lessons. Executive function is the missing link to student achievement. But how can you develop this in the classroom? In this new book, bestselling author Nancy Sulla has the answers. She explains how building executive function requires a combination of activities, structures and teacher facilitation strategies aimed at six increasingly complex life skills that should be the goal of any school: conscious control, engagement, collaboration, empowerment, efficacy and leadership. She also offers a variety of examples, activities and structures fit for every grade level and subject area. With the book's practical strategies and tools, you will be inspired, armed and ready to establish a clear framework for building executive function in all your students.

Structure and Improvisation in Creative Teaching R. Keith Sawyer, 2011-06-27 With an increasing emphasis on creativity and innovation in the twenty first century, teachers need to be creative professionals just as students must learn to be creative. And yet schools are institutions with many important structures and guidelines that teachers must follow. Effective creative teaching strikes a delicate balance between structure and improvisation. The authors draw on studies of jazz, theater, improvisation and dance improvisation to demonstrate that the most creative performers work within similar structures and guidelines. By looking to these creative genres, the book provides practical advice for teachers who wish to become more creative professionals.

Interactions Marilyn Penovich Friend, Lynne Cook, 2003 Provides a cutting edge look at how teams of school professionals—classroom teachers, special education teachers and counselors—can effectively work together to provide a necessary range of services to students with special needs. As a result, future teachers learn how to collaborate with school professionals and families to help special education students who are more often being placed in general classroom settings.
