Characterizing Pedagogical

Flow W.H. Schmidt,2005-12-17 Characterizing Pedagogical Flow presents conclusions from a multi disciplinary multi national research project blending quantitative and qualitative approaches through a discourse methodology The work produced portraits of mathematics and science education that were dramatically different for each of the countries involved France Japan Norway Spain Switzerland and the United States To explain these differences it is proposed that the interaction of curriculum and pedagogy is culturally unique and yields classroom learning experiences that are qualitatively different from country to country This idea has profound implications for how international education research is interpreted
