Student Exploration: 3D Eclipse

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: eclipse, lunar eclipse, path of totality, penumbra, solar eclipse, umbra

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Have you ever seen an **eclipse**? If so, describe what you saw.

No, I have never witnessed an eclipse, though I would like to.

2. How often do you think eclipses happen?

Most likely annually? Since eclipses are uncommon, I assume they occur annually.

Gizmo Warm-up

If you see a two-dimensional image of the Earth, Moon, and Sun, you might predict that an eclipse occurs every time the Moon passes in front of or behind Earth, or about twice a month. However, eclipses occur much more rarely.

The *3D Eclipse* Gizmo shows two views of the Earth, Moon, and Sun: a top view (above) and a side view (below). The sizes of the Earth, Moon, and Sun are not to scale. (If they were, the Earth and Moon would be microscopic!)

1. Set the **Simulation speed** slider to a middle value, and click **Play** (▶). Based on the top view on the **SIMULATION** pane, describe the motions of the Sun, Earth, and Moon.

The moon is going around the earth and the earth is going around the sun

2. Click **Reset** (↺), and then click **Play** again. This time, focus on the side view at the bottom of the **SIMULATION** pane. What do you notice about the Moon's orbit?

When viewed from the side, it appears as though the earth and sun are going to collide as it round the planet, however it is simply the earth passing in front of the sun at certain moments.

Adventure in Prolog Dennis Merritt, 2012-12-06 Not long ago Dennis Merritt wrote one of the best books that I know of about implementing expert systems in Prolog and I was very glad he published it in our series The only problem is there are still some unfortunate people around who do not know Prolog and are not sufficiently prepared either to read Merritt's book or to use this extremely productive language be it for knowledge based work or even for everyday programming Possibly this last statement may surprise you if you were under the impression that Prolog was an artificial intelligence language with very limited application potential Please believe this editor's statement that quite the opposite is true for at least four years I have been using Prolog for every programming task in which I am given the option of choosing the language Therefore I am indeed happy that Dennis Merritt has written another good book on my language of choice and that it meets the high standard he set with his prior book Building Expert Systems in Prolog All that remains for me to do is to wish you success and enjoyment when taking off on your Adventure in Prolog

Connected Minds Nicolas Payette, 2012-04-25 The theme for this volume is social cognition construed from a psychological and collective point of view From the psychological point of view the question is to understand how the human mind processes social information how it encodes stores and uses it in the social context From a collective point of view the question is to understand how individual cognition is influenced improved increased or impaired by social interactions for instance in communicating and collaborating with intelligent agents These two dimensions of social cognition are obviously interdependent the psychological dimension makes the collective dimension possible which can in return modify the psychological dimension The book is divided into four parts The first part is about socio cognitive skills Among those we count face recognition imitation learning embodied social interaction cheater detection and psychological concept acquisition The second part is about persons and memories stereotypes attraction judgements and impression formation are the subjects at hand The third part is about understanding each other A key part of that understanding is the motor system whether or not we see it as a mirror but community membership itself can also contribute to our understanding of others The fourth and final part is about social cognition in societies This section is unified by the common goal of understand how social cognition actually influences the structure of different societies whether whole cultures specific social networks rural communities or even groups of caterpillars
