Interdisciplinary Research Trends in Science, Technology, Engineering, and Mathematics: Studies on Urban

Classrooms Lansiquot, Reneta D.,2012-10-31 Involving two or more academic subjects interdisciplinary studies aim to blend together broad perspectives knowledge skills and epistemology in an educational setting By focusing on topics or questions too broad for a single discipline to cover these studies strive to draw connections between seemingly different fields Cases on Interdisciplinary Research Trends in Science Technology Engineering and Mathematics Studies on Urban Classrooms presents research and information on implementing and sustaining interdisciplinary studies in science technology engineering and mathematics for students and classrooms in an urban setting This collection of research acts as a guide for

researchers and professionals interested in improving learning outcomes for their students Chaos, CNN, Memristors and Beyond Andrew Adamatzky, 2013 This invaluable book is a unique collection of tributes to outstanding discoveries pioneered by Leon Chua in nonlinear circuits cellular neural networks and chaos It is comprised of three parts The first OCo cellular nonlinear networks nonlinear circuits and cellular automata OCo deals with Chua s Lagrangian circuits cellular wave computers bio inspired robotics and neuro morphic architectures toroidal chaos synaptic cellular automata history of Chua s circuits cardiac arrhythmias local activity principle symmetry breaking and complexity bifurcation trees and Chua s views on nonlinear dynamics of cellular automata Dynamical systems and chaos is the scope of the second part of the book where we find genius accounts on theory and application of Julia set stability of dynamical networks chaotic neural networks and neocortical dynamics dynamics of piecewise linear systems chaotic mathematical circuitry synchronization of oscillators models of catastrophic events control of chaotic systems symbolic dynamics and solitons First hand accounts on the discovery of memristors in HP Labs historical excursions into OCyancient memristorsOCO analytical analysis of memristors and hardware memristor emulators are presented in the third and final part of the book The book is quintessence of ideas on future and emergent hardware analytic theories of complex dynamical systems and interdisciplinary physics It is a true Renaissance volume where bright ideas of electronics mathematics and physics enlighten facets of modern science The unique DVD covers the artistic aspects of chaos such as several stunningly melodious musical compositions using chaotic attractors a virtual gallery of hundreds of colorful attractors and even a cartoon like play on the genesis of Chua s circuit that was based on a widely acclaimed performance in Rome and other venues in Italy In short it is a veritable kaleiscope of never before published historical pedagogical and futuristic technical visions on three timely topics of intense interest for both lay readers and experts alike **Democracy and Reform in the Middle East and Asia** Amin Saikal, Amitav

Acharya, 2013-12-23 The protests that swept across the Middle East and North Africa in late 2010 and 2011 confounded long time observers of the region in both the media and academia After addressing the conditions in the Middle East and North Africa that produced these attempts at revolution Amin Saikal and Amitav Acharya explore the global impact of the protests both in terms of their ideological influence on opposition groups and the prospects for democratic transition in a variety of authoritarian and semi authoritarian governments Democracy and Reform in the Middle East and Asia commences with a comprehensive attempt to understand the cultural economic and political background out of which the uprisings in Egypt Tunisia and Libya emerged It then expands outwards investigating the impact of the Arab uprisings on a regional level in other Middle Eastern and north African states such as Iran Morocco and Algeria and on a more global level in the Asian states of China Malaysia Singapore Indonesia and the former Soviet Muslim republics Saikal and Acharya bring a global perspective to the still unfolding wave of calls for more meaningful political participation which continues to make itself felt in the Middle East to shed light upon the ideal role of both regional and international actors in promoting sustainable

transitions from authoritarianism to democracy This book not only offers explanations for why certain countries were more susceptible to the spread of the uprisings in the Middle East and North Africa but also contrasts the organic and grassroots vehicles for democratization characteristic of the most recent Arab uprisings with the Western model of externally imposed regime change to illustrate the conditions necessary for a successful democratic transition Touching on perennial issues in politics for example democracy authoritarian rule and social protest this book is vital for researchers of politics and international relations

Graduate Programs in the Physical Sciences, Mathematics, Agricultural Sciences, the Environment, and Natural Resources 2009 Peterson's,2007-11 The six volumes of Peterson s Annual Guides to Graduate Study the only annually updated reference work of its kind provide wide ranging information on the graduate and professional programs offered by accredited colleges and universities in the United States and U S territories and those in Canada Mexico Europe and Africa that are accredited by U S accrediting bodies Books 2 through 6 are divided into sections that contain one or more directories devoted to individual programs in a particular field Book 4 contains more than 3 800 programs of study in 56 disciplines of the physical sciences mathematics agricultural sciences the environment and natural resources

The SAGE Handbook of Responsible Management Learning and Education Dirk C. Moosmayer,Oliver Laasch,Carole Parkes,Kenneth G.
