Hamilton, 2025-02-12 Approximately one in five adults and one in seven children and youth suffer from mental health disorder over their life span Yet available treatments for mental health problems are only moderately effective and about half of those who need treatment are not benefitted by current treatments and many don't even seek them Equine assisted therapy is a novel experiential treatment approach showing significant promise for adults children and youth across a range of mental health problems These treatments use a horse or horses to facilitate communication and mindful awareness of thoughts emotions and behaviors in an experientially oriented approach via groundwork or riding Interactions with horses have shown to foster emotional regulation self confidence reflection and insight by which well being is facilitated The current book describes the rationale for these treatments add to the knowledge about recent progress in applying them to posttraumatic stress disorder PTSD anxiety attention deficit hyperactivity disorder ADHD and more and analyze the nature of the bonding between humans and equines which makes these relationships so therapeutic and healing **Working With Troubled Men** Morley D.

Glicken, 2006-04-21 This book offers a concise readable research grounded synthesis of the special concerns mental health and other helping professionals need to address when working with men today and explains a wealth of effective gender specific approaches to assessment and intervention that result in more successful outcomes for male clients Many more women than men seek counseling and therapy and to some extent standard services have evolved in response to female styles of communicating and problem solving Practitioners frequently feel frustrated and baffled by their male clients because they seem unresponsive to treatment approaches that work so well for women But many men benefit from therapy when practitioners understand male socialization and the ways men communicate and problem solve Too many men today are doing badly and are in real need of help Almost half of America's male children grow up in single parent homes headed by mothers where they seldom have male mentors or role models Fewer men than women attend or graduate from college and increasing levels of binge drinking and date rape on campuses paint a discouraging picture of men on campus Male violence continues to be a serious problem in many American communities with male youth violence continuing at epidemic levels Men die younger than women overall and in much higher proportions from suicide homicide and cirrhosis of the liver
