subject at the workplace e.g. operators, decision makers. Machine is the general name for any object controlled by Man including tools, machinery, computers, systems and technologies and Environment describes the specific working conditions under which Man and Machine interact e.g. temperature, noise, vibration, hazardous gases etc. In turn, the three goals of optimization are to ensure safety, efficiency and economy in this context. These proceedings present interdisciplinary studies on the concepts and methods of physiology, psychology, system engineering, computer science, environmental science, management, education and other related disciplines. They offer a valuable resource for all researchers and professionals whose work involves interdisciplinary areas touching on MMESE subjects.
