intermediate goals will be presented with a brief justification. Unfortunately, the intermediate goals will be presented as if all the goals were the property of the intermediate goals. That is, the goals will be presented as if the intermediate goals were the only goals. In addition, you will see the intermediate goals listed with a justification that is not the justification of the goal. It is a common mistake.

One important class of chemical reactions is double-displacement reactions. These occur when elements (and) compounds undergo trading or replacing ions. For example, in the following double-displacement reaction, the products are:

It is not an effective treatment for the "bad" bacteria. Instead, it kills the good bacteria and stops competing with the bad ones. This makes it worse.
