

USING A MANNEQUIN

A mannequin (also called a model or dummy, for figure or dress form) is an often articulated doll used for artistic, fashion, anatomical, medical, and other purposes in design or the sciences.

For artists, mannequins already handle some of the body's basic shapes, rounded, geometric shapes. They compare with basic anatomical forms of volume that artists are painting over mannequins in different poses and gestures. Drawing is, if you are willing to draw honestly, to see the subject as you is a mannequin in particular specific poses that you find particularly difficult.

Of course, mannequins are not quite rigid, so they are not a substitute for practice on humans. On the other side of the flip and observe all of the figure (or photograph) before to make sure you figure out the form.

PRACTICE DRAWING SHAPES

Building a drawing that is composed of geometric shapes will require that you start from a point and move together. Working back and forth between a point and a line, you can create a series of shapes. As you move from the point to the line, you can create a series of shapes. - The oval is the front of the face and jaw.
- The cross is the middle of the face, and the vertical line is the face when the face is located.
- Another oval can be added to the side of the head when the face is located.
