Human Dignity, Judicial Reasoning, and the Law Brett G. Scharffs,Andrea Pin,Dmytro Vovk,2024-05-28 This volume explores how national and international human rights courts interpret and apply human dignity The book tracks the increasing deployment of the concept of human dignity within courts in recent decades It identifies how human dignity based arguments have expanded to cover larger sets of cases from the right to life or the right to integrity or anti discrimination the concept has surfaced in disputes about political and social rights and rule of law requirements such as equality or legal certainty The core message of the book is that judges understand interpret and apply human dignity differently An inflation in the judicial recourse to human dignity can saturate the legal environment depriving the concepts as well as human rights based narratives of salience and threaten the predictability of court decisions The book will appeal to philosophers of law constitutional theorists and lawyers legal comparativists and international law specialists While being dedicated specifically to human dignity jurisprudence the book touches on many aspects of judiciary and as such will also be of interest to researchers studying legal reasoning interpretation and application of the law and courts as well as social philosophers political scientists and sociologists of law politics and religion

Sustainable Green Chemical Processes and their Allied Applications Inamuddin,Abdullah Asiri,2020-05-30 Urbanization industrialization and unethical agricultural practices have considerably negative effects on the

environment flora fauna and the health and safety of humanity Over the last decade green chemistry research has focused on discovering and utilizing safer more environmentally friendly processes to synthesize products like organic compounds inorganic compounds medicines proteins enzymes and food supplements These green processes exist in other interdisciplinary fields of science and technology like chemistry physics biology and biotechnology Still the majority of processes in these fields use and generate toxic raw materials resulting in techniques and byproducts which damage the environment Green chemistry principles alternatively consider preventing waste generation altogether the atom economy using less toxic raw materials and solvents and opting for reducing environmentally damaging byproducts through energy efficiency Green chemistry is therefore the most important field relating to the sustainable development of resources without harmfully impacting the environment This book provides in depth research on the use of green chemistry principles for a number of applications **Higher Education in the Era of the Fourth Industrial Revolution** Nancy W.

Gleason,2018-06-21 This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution Considering significant trends in how people are learning coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations it looks at new programs and technological advances that are changing how and why we teach and learn The book addresses trends in liberal arts integration of STEM innovations the changing role of libraries in the digital age global trends in youth mobility and the development of lifelong learning programs This is coupled with case study assessments of the various ways China Singapore South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands shifts that are already underway Offering examples of new frameworks in which collaboration between government industry and higher education institutions can prevent lagging behind in this fast changing environment this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education *Fees Must Fall* Susan Booyesen,2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution

This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt

Applications of Functional Foods and Nutraceuticals for Chronic Diseases Syam Mohan, Shima Abdollahi, Yashwant Pathak, 2023-02-09 While disease is inevitable in humankind the current century has been burdened with many chronic diseases most of which are lifestyle mediated and which in part can be controlled by consuming foods with specific functions Functional foods are a special category of natural food or nutrient derived pharmaceutical products containing beneficial biochemicals and phytochemicals beyond their basic nutritional functions The first of two volumes Applications of Functional Foods and Nutraceuticals for Chronic Diseases collects information on the association between functional and chronic diseases The burden of escalating chronic diseases is discussed in the first chapter and the remaining fourteen chapters summarize the effect of functional foods on a range of chronic diseases Key Features Discusses the clinical application of functional foods for the management of a wide range of chronic diseases Covers chronic diseases including Obesity Arthritis Cardiovascular Diseases and Endocrinal and Hormonal Diseases among others Explores beneficial effects of nutraceuticals on chronic diseases Contributors hail from different geographical locations around the world and have many years of research and scholarly experience in functional foods nutraceuticals and biology The world's leading wellness centers for chronic diseases are using functional foods and nutraceuticals in their practice and discovering their useful applications and this book is a great reference for practitioners scientists and clinicians in the management of chronic diseases

Swarm Intelligence and Evolutionary Computation Georgios Kouziokas, 2023-03-07 The aim of this book is to present and analyse theoretical advances and also emerging practical applications of swarm and evolutionary intelligence It comprises nine chapters Chapter 1 provides a theoretical introduction of the computational optimization techniques regarding the gradient based methods such as steepest descent conjugate gradient newton and quasi Newton methods and also the non gradient methods such as genetic algorithm and swarm intelligence algorithms Chapter 2 discusses evolutionary computation techniques and genetic algorithm Swarm intelligence theory and particle swarm optimization algorithm are reviewed in Chapter 3 Also several variations of particle swarm optimization algorithm are analysed and explained such as Geometric PSO PSO with mutation Chaotic PSO with mutation multi objective PSO and Quantum mechanics based PSO algorithm Chapter 4 deals with two essential colony bio inspired algorithms Ant colony optimization ACO and Artificial bee colony ABC Chapter 5 presents and analyses Cuckoo search and Bat swarm algorithms and their latest variations In chapter

6 several other metaheuristic algorithms are discussed such as Firefly algorithm FA Harmony search HS Cat swarm optimization CSO and their improved algorithm modifications The latest Bio Inspired Swarm Algorithms are discussed in chapter 7 such as Grey Wolf Optimization GWO Algorithm Whale Optimization Algorithm WOA Grasshopper Optimization Algorithm GOA and other algorithm variations such as binary and chaotic versions Chapter 8 presents machine learning applications of swarm and evolutionary algorithms Illustrative real world examples are presented with real datasets regarding neural network optimization and feature selection using genetic algorithm Geometric PSO Chaotic Harmony Search Chaotic Cuckoo Search and Evolutionary Algorithm and also crime forecasting using swarm optimized SVM In chapter 9 applications of swarm intelligence on deep long short term memory LSTM networks and Deep Convolutional Neural Networks CNNs are discussed including LSTM hyperparameter tuning and Covid19 diagnosis from chest X Ray images The aim of the book is to present and discuss several state of the art swarm intelligence and evolutionary algorithms together with their variances and also several illustrative applications on machine learning and deep learning

Applications of Remote Sensing Data in Mapping of Forest Growing Stock and Biomass José Aranha, 2021-09-01

This Special Issue SI entitled Applications of Remote Sensing Data in Mapping of Forest Growing Stock and Biomass resulted from 13 peer reviewed papers dedicated to Forestry and Biomass mapping characterization and accounting The papers authors presented improvements in Remote Sensing processing techniques on satellite images drone acquired images and LiDAR images both aerial and terrestrial Regarding the images classification models all authors presented supervised methods such as Random Forest complemented by GIS routines and biophysical variables measured on the field which were properly georeferenced The achieved results enable the statement that remote imagery could be successfully used as a data source for regression analysis and formulation and in this way used in forestry actions such as canopy structure analysis and mapping or to estimate biomass This collection of papers presented in the form of a book brings together 13 articles covering various forest issues and issues in forest biomass calculation constituting an important work manual for those who use mixed GIS and RS techniques

14th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2019) Francisco Martínez Álvarez, Alicia Troncoso Lora, José António Sáez Muñoz, Héctor Quintián, Emilio Corchado, 2019-04-30 This book includes 57 papers presented at the SOCO 2019 conference held in the historic city of Seville Spain in May 2019 Soft computing represents a set of computational techniques in machine learning computer science and various engineering disciplines which investigate simulate and analyze very complex issues and phenomena The selection of papers was extremely rigorous in order to maintain the high quality of the conference which featured a number of special sessions including sessions on Soft Computing Methods in Manufacturing and Management Systems Soft Computing Applications in the Field of Industrial and Environmental Enterprises Optimization Modeling and Control by Soft Computing Techniques and Soft Computing in Aerospace Mechanical and Civil Engineering New methods and Industrial Applications
