A New Generation Material Graphene: Applications in Water Technology
Mu. Naushad, 2018-06-20 This book presents a unique collection of up to date applications of graphene for water science Because water is an invaluable resource and the intelligent use and maintenance of water supplies is one of the most important and crucial challenges that stand before mankind new technologies are constantly being sought to lower the cost and footprint of processes that make use of water resources as potable water as well as water for agriculture and industry which are always in desperate demand Much research is focused on graphene for different water treatment uses Graphene whose discovery won the 2010 Nobel Prize in physics has been a shining star in the material science in the past few years Owing to its interesting electrical optical mechanical and chemical properties graphene has found potential applications in a wide range of areas including water purification technology A new type of graphene based filter could be the key to managing the global water crisis According to the World Economic Forum's Global Risks Report lack of access to safe clean water is the biggest risk to society over the coming decade Yet some of these risks could be mitigated by the development of this filter which is so strong and stable that it can be used for extended periods in the harshest corrosive environments and with less maintenance than other filters on the market The graphene based filter could be used to filter chemicals viruses or bacteria from a range of liquids It could be used to purify water dairy products or wine or in the production of

pharmaceuticals This book provides practical information to all those who are involved in this field **Engineering**

Biomaterials for Neural Applications Elizabeth Nance,2022-10-28 This contributed volume explores the ways in which researchers engineer new biomaterials for the challenging problems of the peripheral and central nervous systems These biomaterials are uniquely positioned for use in creating in vitro models of injury and disease testing therapeutic treatments understanding neural development and mapping the multi scalar environment of the brain This book informs readers from biology chemistry materials science engineering and neuroscience on cutting edge research in engineering technologies from fundamental material development through pre clinical studies The book also highlights target applications in three areas of research 1 engineering neural models and materials 2 probing biological underpinnings of neurological function and disease and 3 designing therapeutic and diagnostic treatments for neurological disease **The Urban Ecologies of Divided Cities**

Amira Osman,John Nagle,Sabyasachi Tripathi,2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers ECIE 2021 16th
