## **Application Architecture Documentation:**

**Documenting Software Architectures** Paul Clements, Felix Bachmann, Len Bass, David Garlan, James Ivers, Reed Little, Paulo Merson, Robert Nord, Judith Stafford, 2010-10-05 Software architecture the conceptual glue that holds every phase of a project together for its many stakeholders is widely recognized as a critical element in modern software development Practitioners have increasingly discovered that close attention to a software system s architecture pays valuable dividends Without an architecture that is appropriate for the problem being solved a project will stumble along or most likely fail Even with a superb architecture if that architecture is not well understood or well communicated the project is unlikely to succeed Documenting Software Architectures Second Edition provides the most complete and current guidance independent of language or notation on how to capture an architecture in a commonly understandable form Drawing on their extensive experience the authors first help you decide what information to document and then with guidelines and examples in various notations including UML show you how to express an architecture so that others can successfully build use and maintain a system from it The book features rules for sound documentation the goals and strategies of documentation architectural views and styles documentation for software interfaces and software behavior and templates for capturing and organizing information to generate a coherent package New and improved in this second edition Coverage of architectural styles such as service oriented architectures multi tier architectures and data models Guidance for documentation in an Agile development environment Deeper treatment of documentation of rationale reflecting best industrial practices Improved templates reflecting years of use and feedback and more documentation layout options A new comprehensive example available online featuring documentation of a Web based service oriented system Reference guides for three important architecture documentation languages UML AADL and SySML

**Built Environment, Modernization, and Turkish Nationalism** Serra Akboy-Ilk,2022-09-06 Against the backdrop of building a new country this study explores and evaluates the documentation culture in early republican Turkey Having fought the Turkish War of Independence 1919 22 against the Allied Powers the revolutionaries led by legendary leader Mustafa Kemal Atatürk 1881 1938 came to engage with the idea of the West and its cultural origin With the proclamation of the Republic of Turkey in 1923 the constitution abolished the 600 year old Ottoman Empire including the dynastic cultural economic educational and governmental institutions In the redemption of the nation within the modern history of civilizations cultural Westernization and technical modernization became the model for the newly found nation state While the new country became the subject of reformation historic architecture was called upon to grant the aura of a glorious past to the Turks Through the materialization of Türk Tarih Tezi the Turkish History Thesis the founding leaders focused on the origin of Turks and the everlasting spirit of the Turkish state In this pursuit architectural heritage signified the formative power to represent the past Supported by state agencies scholars with supreme patriotic zeal and diligence travelled across the

remotest corners of the country to document and study the historic architecture of the nation To date the complicated question of a national identity embodied in the built environment has dominated the contemporary scholarship on early republican historiography Akboy I lk s study however distinguishes itself with its focus on architectural documentation which became an agent of history writing in the early years of the nation state Curated by the ideologies of the state the formal documentation findings extensively informed the republican plot of the modern progress of Turks For scholars interested in a closer reading of the crossing boundaries between architectural heritage and nation building in the case of the modernization of Turkey this book is revealing and provocative in bringing forward architectural documentation a remarkably overlooked subject in studies of the area
