Emerging Engineering Technologies and Industrial Applications El Kacimi, Younes,Alaoui, Khaoula,2024-05-06 Engineers have long been architects of progress erecting massive buildings that touch the skies and designing technologies that redefine realms of known possibility In this era of rapid change keeping pace with innovation is the main challenge Emerging Engineering Technologies and Industrial Applications is a comprehensive research book that delves deep into the heart of a relentless technological revolution within modern industry From the limitless potential of the Internet of Things IoT to the cognitive wonders of Artificial Intelligence AI from the microscopic marvels of Nanotechnology to the precision and agility of Robotics and from the revolutionary advancements in 3D Printing to the transformative capabilities of blockchain this book explores emerging technologies This book is an indispensable resource for professionals and researchers working in the field of emerging engineering technologies and their industrial applications It caters to a diverse range of disciplines including computer science and information technology environmental agricultural and physical sciences medical healthcare and life sciences as well as science and engineering and anyone seeking to navigate the current technological progress in the 21st century *Drum* ,2007

Social and Professional Applications of Actor-Network Theory for Technology Development Tatnall, Arthur,2012-10-31 The latest advances in technology development have been particularly useful to actor network theory as a structure for much of its research With a socio technical approach to the understanding of information systems and applications the actor network theory aims to bring support for social influence on technological innovations Social and Professional Applications of Actor Network Theory for Technology Development presents a platform for the approaches and implementations on the actor network theory and its relationship with technology development This book provides researchers and practitioners with a better understanding of the usefulness of the social and technical connection

Transforming Universities in South Africa ,2020-08-31 The idea of transformation in higher education underpins all policy documents academic literature and on going debates in South Africa Transforming Universities in South Africa Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa s higher education stands across the continent and globally particularly within the country s efforts to overcome decades of socio economic imbalances It addresses the question of whether South Africa s transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally This volume s ultimate purpose is to provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage *Layered Double Hydroxides (LDHs)* Roberto Pizzoferrato,Maria Richetta,2021-04-01 Layered Double Hydroxides LDHs certainly do not represent a newcomer to the

scientific community yet they continue to attract a strong and general interest among a vast and multifaceted range of researchers. This persistent modernity is definitely due to some peculiar characteristics of these materials which allow researchers and engineers to play with different aspects of two worlds: organic and inorganic, crystalline and molecular, solid and liquid, cationic and anionic. A virtually infinite number of possible chemical combinations takes advantage of their layered structure to express an unrivaled collection of remarkable properties. The capture and/or release of organic and inorganic species, versatile low cost catalytic activity and blending with other compounds to build up a variety of hybrid composites are just some of the many effects investigated to date. As a result, the applications encompass almost all aspects of our life ranging from renewable energy production to water purification including biomedical applications, gas sensing, drug delivery and food packaging and safety. This Special Issue highlights some of the recent research lines and shows that remarkable progress has been and is still being made in all these aspects to allow the consideration of LDHs as one of the most interesting and versatile inorganic materials.

Higher Education, Community Engagement and Entrepreneurship in Southern Africa I. G. Govender, 2021-02-24 This volume explores the pressing issues of entrepreneurship education and development in Southern Africa. It discusses the various roles of higher education institutions in enhancing entrepreneurship in localised communities and provides a systematic solution for improving the Southern African economy by realising the importance of empowering the youth with entrepreneurial skills. In addition, successful development requires effective policies and contemporary approaches to both community engagement and entrepreneurship management. The book uses different Southern African case studies to discuss the various issues and innovations in entrepreneurship in the country.

The Guide to COIL Virtual Exchange Jon Rubin, Sarah Guth, 2023-07-03 This is the authoritative guide to implementing COIL Virtual Exchange, conceived and co-edited by one of the originators of this innovative approach to internationalization. Jon Rubin, COIL, the acronym for Collaborative Online International Learning, is a central modality of what has come to be known as virtual exchange. Since its first iteration in 2002, it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research. COIL Virtual Exchange at its most essential is a bi-lateral online exchange involving the integration of existing courses across two or sometimes more institutions that are geographically and/or culturally distinct. To launch a COIL VE course, the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country. Together, their students engage and develop joint projects usually over a continuous five to eight week period. Compared to the limited number of students worldwide who can engage in study abroad, COIL VE

potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all students involves them in rigorous disciplinary and interdisciplinary studies and promotes close and constructive engagement with students with different cultural perspectives While many COIL courses are launched by individual instructors based on their research connections and online outreach they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development This comprehensive guide covers COIL VE pedagogy provides examples of what takes place in the COIL classroom and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum It addresses how institutional stakeholders especially those in leadership positions can develop and embed a successful COIL initiative at their institution It offers varied perspectives of COIL viewed from different institutional and cultural vantage points from research universities community and technical colleges and university systems and describes how COIL VE is developing in five different world regions presenting eleven case studies The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE Additionally the book provides links to the COIL Connect for Virtual Exchange website <https://coilconnect.org> which includes an updated directory of organizations an expanding database of faculty and institutions participating in COIL and looking for partners course templates survey data and case studies This book offers faculty and administrators across the world whether formally involved in international education in service learning and community engagement or wanting to incorporate a cross cultural perspective in their disciplinary courses theoretical foundations guidance on effective collaboration and the strategic and pedagogical considerations to develop robust COIL VE courses and programs

Urban Ecologies of Divided Cities Amira Osman,John Nagle,Sabyasachi Tripathi,2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers Polymers and Two-Dimensional Nanocomposites Rotimi Sadiku,Yskandar Hamam,Suprakas Sinha

Ray,Oladipo Folorunso,2024-11-23 Polymers and Two Dimensional Nanocomposites provides a detailed review of recent progress in this important research field The chapters cover new developments in synthesis methods fabrication techniques sample preparation methods surface modification characterization methods of enhancing the properties of these materials and industrial applications in energy environmental oil and gas sensors corrosion biomedical and structural applications The book provides a valuable reference resource for academic and industrial researchers materials scientists and engineers working in the fields of polymer science and engineering polymer composites and nanocomposites Covers recent developments in synthesis characterization properties and applications Discusses new fabrication techniques and how to

Structuring Mass Higher Education David

Palfreyman,Ted Tapper,2012-10-12 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide

Design of Functional Polymer Nanocomposites Rotimi Sadiku,Oluranti Agboola,Kokkarachedu

Varaprasad,Mapula Lucey Mavhungu,2025-07-01 Design of Functional Polymer Nanocomposites Interface and Interphase Reactions Compatibilization and Bond Behavior and Functionalization Procedures reviews the latest developments in this fast moving research field The book discusses interface and interphase interactions in polymer nanocomposites as well as compatibilization behavior and different functionalization procedures It illustrates how each of these essential tools can be used in the design of new polymer nanocomposites for a broad range of different industrial scale applications In the research and development of polymer nanocomposites the interface and interphase reactions of different constituents is extremely

important They play a vital role in introducing additional features and in the final resultant properties of the nanocomposite In addition final properties are also dependent upon the bond behavior and the reaction and interface created between the two constituents Covers interface and interphase reactions Discusses compatibilization behavior and different functionalization procedures as essential design tools Presents preparation strategies such as polycondensation copolymerization and free radical chains polymerization Provides a diverse focus on a wide range of high performance applications
